Online Learning

The QS Stars™ rating system is operated by the QS Intelligence Unit, the independent compiler of the QS World University Rankings® since 2004. The system evaluates universities across a wide range of important performance indicators as set against pre-established international standards. By covering a broader range of criteria than any world ranking exercise, QS Stars shines a light on both the excellence and the diversity of the rated institution.

TOP 20 IN ASIA & TOP 5 IN ASEAN

APU has achieved outstanding recognition in the AppliedHE All Asia 2026 Private University Ranking. This remarkable achievement reflects our unwavering commitment to academic excellence, innovation, and global impact. The AppliedHE Private University Ranking: All Asia was created with the goal of measuring the things about private universities that students deciding on their higher education journey find most important. The ranking measures what is important to students: the quality of teaching and learning, Employability, Research, Internationalisation, Community Engagement and Institution Reputation.

APU MAKES WAVES IN THE QS WORLD UNIVERSITY RANKING 2027 - TOP 2% GLOBALLY

The Asia Pacific University of Technology & Innovation (APU) has been officially recognised among the world's leading universities in the QS World University Rankings 2027, achieving a global ranking of #528 and placing APU within the Top 2% of universities worldwide. APU is also ranked #20 in the World for International Students, reflecting its highly diverse, multicultural and globally inclusive learning environment, with students representing more than 130 nationalities studying together on campus.

APU IS AWARDED 2026 EMPLOYERS' CHOICE OF UNIVERSITY - TALENTBANK

Renowned for its 100% employability rate among graduates, APU underlined its strengths by being selected as the 2026 Employers' Choice of University in Talentbank's annual survey of employers. Further reinforcing its strong employability outcomes, APU programmes received the prestigious Talentbank 6-Star Employer Choice rating in the following fields: Computing & IT, Actuarial Science, Analytics, Animation, Banking, Business Management, Event Management, Finance, Games Design & Development, Human Resource Management, and Mechatronic Engineering.

APU IS AWARDED BEST AI UNIVERSITY, BEST TECH UNIVERSITY & BEST FUTURE READY UNIVERSITY - PC.COM AWARDS 2025

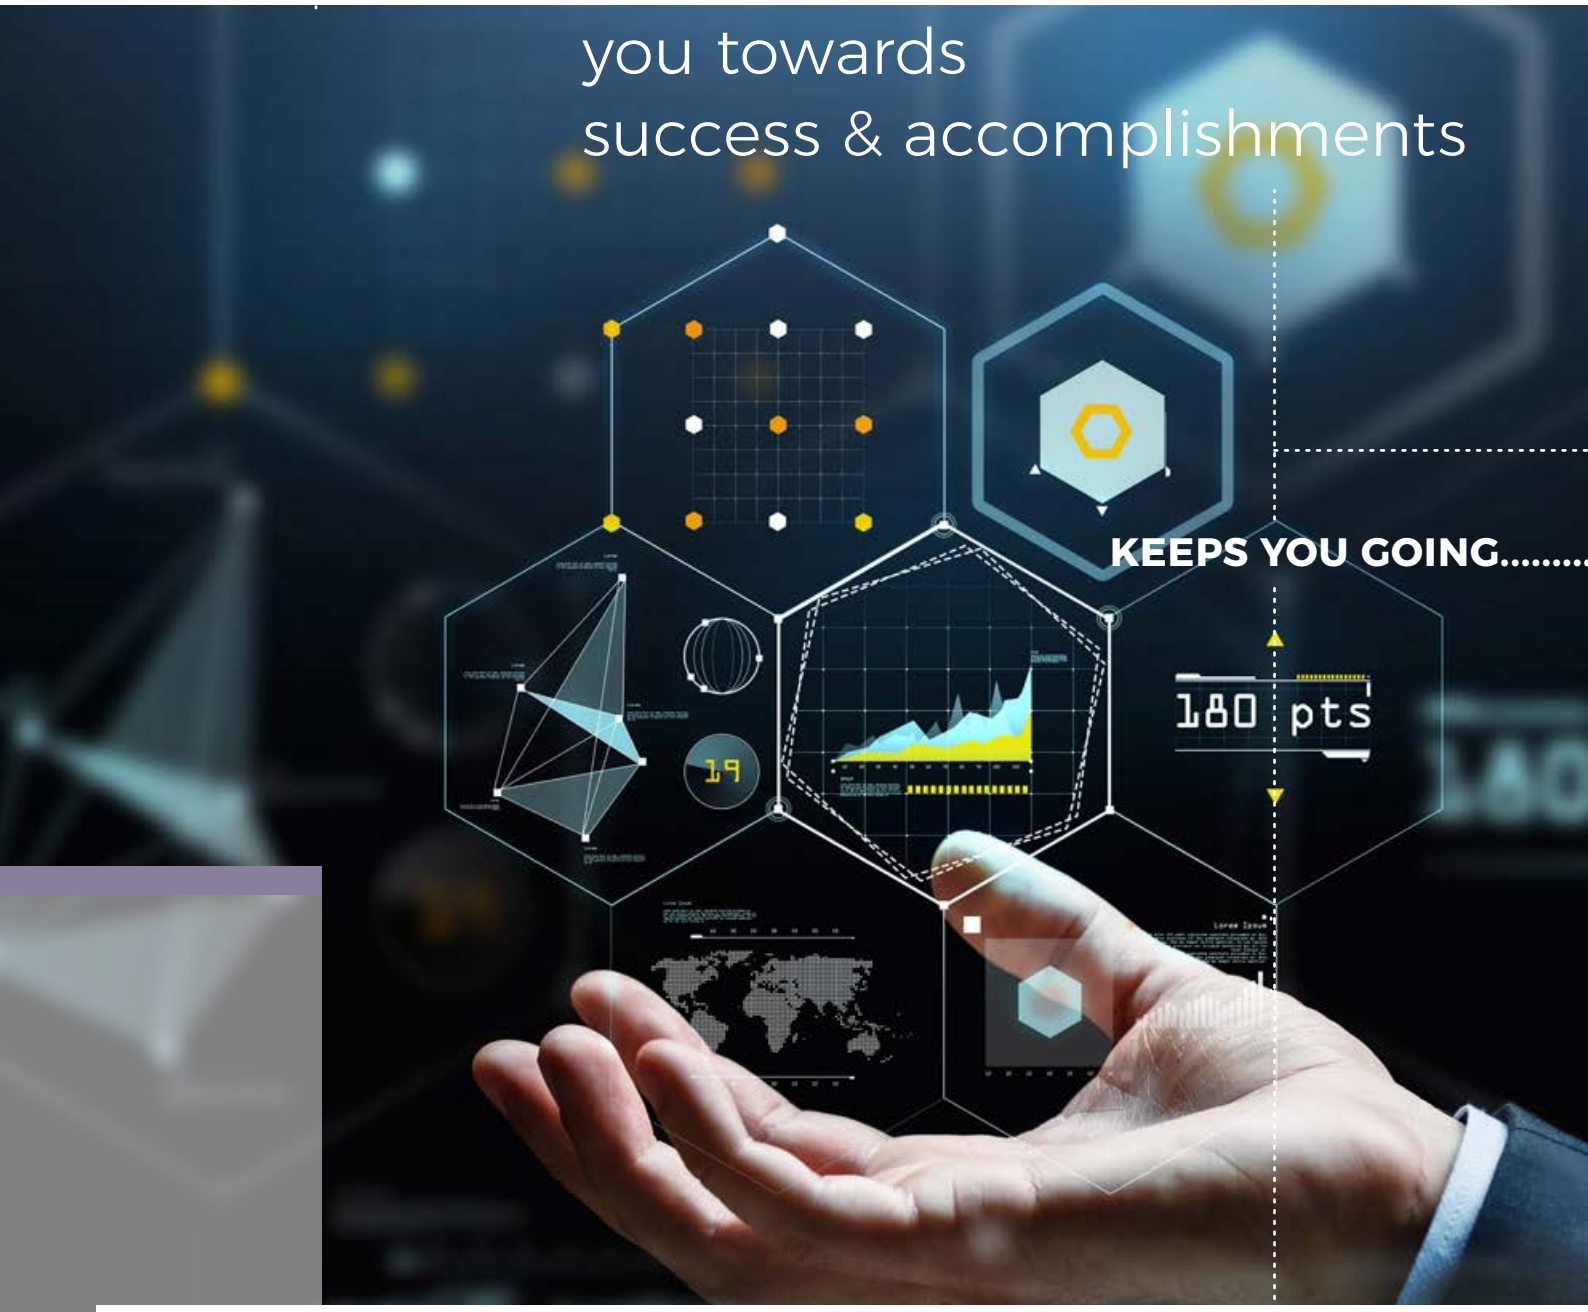

The PC.com Awards are prestigious accolades that celebrate organisations demonstrating excellence and leadership in technology and innovation. At the 2025 Awards, Asia Pacific University of Technology & Innovation (APU) once again stood out, earning Best Tech University, Best Future Ready University, and the newly introduced Best AI University titles, as voted by PC.com readers. These achievements reaffirm APU's dedication to delivering world-class digital technology programmes and shaping future-ready graduates. APU continues its winning streak, having previously secured both Best Tech University and Best Future Ready University in 2024, and Best Tech University in 2023.

APU'S LIST OF FIRSTS:

1st Malaysian University to achieve Five Stars Plus in the latest QS Stars Rating
1st Local Institute awarded Multimedia Super Corridor Status
1st Institute awarded the MSC Research & Development Grant
1st Institute awarded MS ISO 9002 Quality Certification
1st Institute appointed Novell Education Academic Partner
1st Institute appointed Authorised Sun Education Centre
1st Institute appointed Microsoft Training Partner
1st Institute listed in Enterprise 50 Award Programme
1st Institute appointed University Alliance Partner by SAP
1st XR Studio - Mixed & Extended Reality Infrastructure in Asia
1st Integrated Cybersecurity Talent Zone in Malaysia

APU – A 5-STAR (EXCELLENT) RATED INSTITUTION

5 STAR
EXCELLENT RATING
SETARA
APU amongst the Highest Rated Emerging Universities - 2019

APU has consistently received the highest ratings among emerging Universities through the SETARA Ratings exercise conducted by the Ministry of Higher Education, ever since the SETARA Ratings system was introduced, including having attained 5 STARS in the latest ratings announced in Dec 2020.

The SETARA ratings system employs a rigorous assessment methodology to rate an education institution's three core functions, namely teaching, research and services.

APU IS A PREMIER DIGITAL TECH INSTITUTION - MALAYSIA DIGITAL ECONOMY CORPORATION

MD
Premier Digital Tech Institution

APU was among the first institute in Malaysia awarded Premier Digital Tech Institution status by the Malaysia Digital Economy Corporation (MDEC) and Ministry of Higher Education (MOHE). APU is recognised for its commitment to offer top-notch digital technology courses and ensuring our highly-skilled graduates continue to flourish and fill future digital job demands locally and globally.

APU - FIRST EVER MALAYSIAN UNIVERSITY WITH QAA UK ACCREDITATION

Experience

APU's iconic campus

Asia Pacific University of Technology & Innovation (APU) is amongst Malaysia's Premier Private Universities, and is where a unique fusion of technology, innovation and creativity works effectively towards preparing professional graduates for significant roles in business and society globally.

An Ultra-modern Campus Built Today for the Needs of Tomorrow

Asia Pacific University of Technology & Innovation (APU)'s Ultra-Modern University Campus in MRANTi - Technology Park Malaysia is designed to be the state-of-the-art teaching, learning and research facility providing a conducive environment for students and staff. TPM is the ideal location for this new and contemporary campus due to its strong positioning as Malaysia's primary hub for leading-edge and high-tech developments in a wide variety of areas. It is also located in one of the most rapidly developing areas in Kuala Lumpur, and is well served and accessible through major highways, LRT and other forms of public transportation.

APU has earned an enviable reputation as an award-winning University through its achievements in winning a host of prestigious awards at national and international levels.

Malaysia's Award Winning University

- A Stylish Blend of Functionality & Accessibility
- A Unique Fusion of Technology, Innovation and Creativity
- Cutting-edge Technologies
- A Wide Variety of Spaces to Learn, Engage & Transform

APU's iconic campus is setting a new benchmark for design excellence among Malaysian Universities, combining an eco-friendly campus with a dynamic blend of technology and innovation to enable professional learning. It is a magnificent teaching & learning space for our students & staff designed by our award-winning architects & consultants.

Empowering High-Impact Careers

APU is widely recognised for producing career-ready graduates with exceptional employability and competitive starting salaries across Malaysia's key growth sectors. By integrating industry-relevant curricula, practical learning experiences, and strong corporate engagement, APU equips its graduates to succeed in dynamic and globally connected career pathways.

100% of our graduates are employed by graduation*; this is not just a number, but a significant symbol of our success and pride in nurturing professionals for global careers.

** Latest Graduate Tracer Study by Ministry of Higher Education, Malaysia.*

Industry Ready Graduates

The APU Career Centre connects and engages with over 12,000 Employers to ensure that our graduates are highly employable in both local and international corporations, as it closely supports APU students in both internship and career placement activities.

Work-ready, World-ready

Study with us and we'll equip you to become a world-ready professional, with the knowledge, attributes, skills and expertise that employers look for.

Employers are demanding that graduates not just have qualifications, but also have the experience and ability to contribute to the workplace. To meet these demands, APU develops programmes and partnerships with academic and industry partners, with a heavy focus on applied learning. This helps to ensure that the skills and knowledge taught at APU are up-to-date and in high demand.

RANKED

#20 in the World for International Students

QS World University Rankings 2027

A Hub of Cultural Diversity

With students from over 130 countries, we ensure that you will gain memorable experiences alongside the diversifed and colourful cultural environment. We have students from Asia, Central Asia, Middle East, Africa, Europe, Latin America and Oceania. Our International Students Support Centre helps you with the procedure to apply for your Student Pass before coming here. Upon arrival in Kuala Lumpur, you will be greeted with warmth by our friendly staff, who will pick you up and bring you to our campus.

Student Welcome Team

The Student Welcome Team was established by Asia Pacific University of Technology & Innovation (APU) to improve the arrival experience of international students in Malaysia. “Warm Welcome, Warm Hello, Warm What's up” is the theme of this ASK ME Team.

QS WORLD UNIVERSITY RANKINGS 2027

A Truly International Community

Just like the beautiful country in which we are located, APU is a rich blend of traditional and modern styles. We have developed a singular character to embrace those things that set us apart. We pride ourselves on the quality of both our teaching and research as well as having a unique living and learning environment.

Student Life @ APU

Being a university student can be one of your most exciting expeditions. Higher education opens up a world of new ideas, intellectual growth, new adventures and the building of lifelong friendships. Here at APU, we support you to take the time to explore not only the educational experiences but also the wide range of social, sporting and cultural activities on campus.

World-class

Facilities @ APU

An Integrated Community

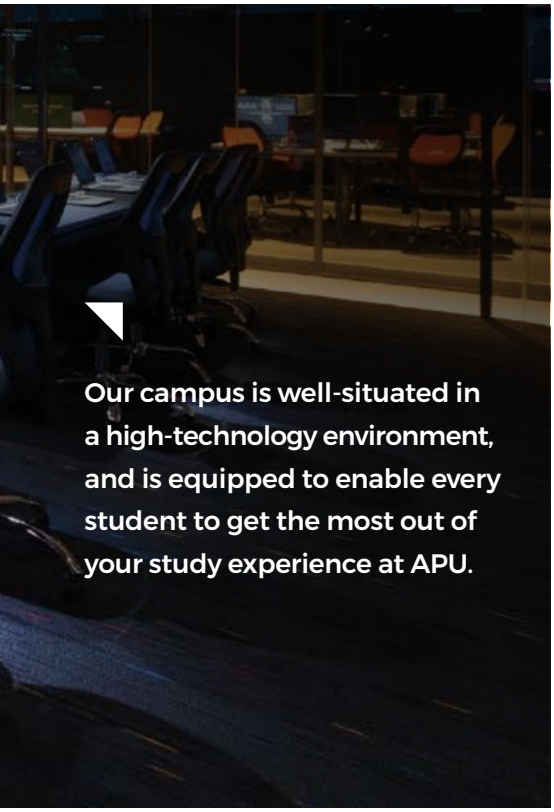

The campus aims to establish a community aspect for the university – where integration is the key. Walkways, classrooms, communal spaces and discussion areas promote connectivity and cultivates exchange of ideas among students from different disciplines and academics, to implement cooperative learning concepts in line with the Industry Revolution 4.0.

APU provides access to world-class resources across a wide range of disciplines. This translates into industry-ready skills and a competitive edge for graduates.

Our campus is well-situated in a high-technology environment, and is equipped to enable every student to get the most out of your study experience at APU.

Cutting-Edge Technologies

The Campus blends technology, integration, innovation and creativity under one roof. It provides not just a learning environment, but also a lively community spot for our students to formulate new ideas, gain intellectual growth and discover new adventures. It is not only a university campus, but also the nurturing ground for world-changing global ideas. All spaces are carefully designed to create an unforgettable learning and lifestyle experience that lasts for a lifetime, while enabling professional learning and cultivating global mindsets. APU, as Malaysia's leading technological university, is the incubator for self-starting and innovative APU graduates. Our educational technology environment supports the development of graduates of this calibre, in which well-equipped computing and engineering laboratories with advanced software, hardware and technologies place students at the forefront of technological excellence.

Social Interaction Platforms

Fitness Sweatzone, student lounges, sports facilities and breakout rooms provide spaces for relaxation and socialisation throughout the day. They are carefully designed to create an unforgettable learning and lifestyle experience that lasts for a lifetime, especially for students who are studying away from home.

Our Partner in Quality

De Montfort University (DMU), UK

150 years of academic excellence

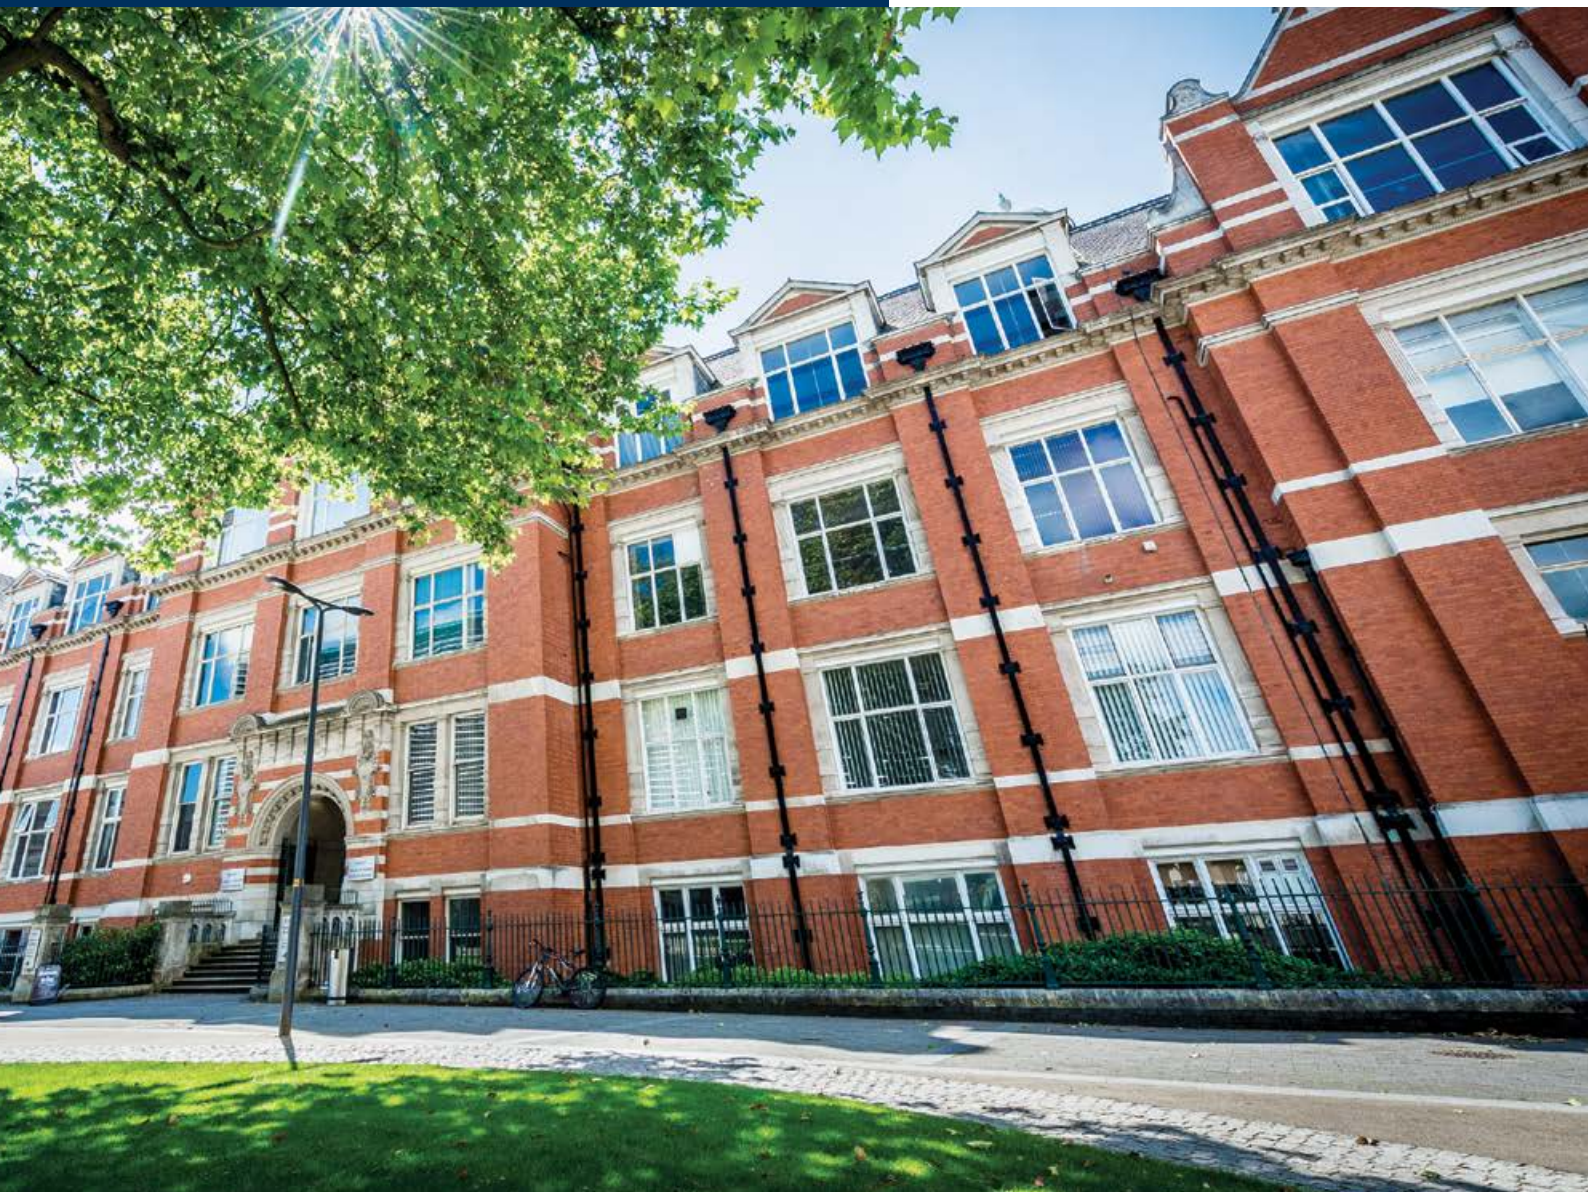

De Montfort University (DMU) Leicester is a dynamic, 21st century UK university. With an original campus in Leicester, a new one in London and growing campuses around the world in Dubai, Kazakhstan and Cambodia, DMU has a truly global outlook and international reach.

At DMU, our supportive and nurturing community will empower you to realise your dreams. Our courses are carefully designed and taught by expert academics to help you gain the skills needed to enter today's competitive job market and succeed in your career. The university is organised into four faculties; Arts, Design and Humanities, Business and Law, Health and Life Sciences and Computing, Engineering and Media. Our award-winning Careers Team provides guaranteed work experience opportunities including placements, internships and career mentoring to open doors that will help you achieve your ambitions..

DE MONTFORT UNIVERSITY LEICESTER

About DMU

- Since its beginnings in Leicester 150 years ago, DMU has transformed into a global university. We deliver outstanding education around the world, both at our own campuses and with our partner universities.
- Each year, international students from more than 140 countries choose to study at DMU.
- DMU is rated a 5-star 'excellent' institution by QS Top Universities for our teaching, facilities, employability, global outlook and more.
- DMU's Careers Team won Employability Team of the Year at the TargetJobs National Graduate Recruitment Awards for helping students reach their ambitions.
- DMU is the only UK university to be appointed as Chair of the hub for the United Nations' sustainable development goal 11 - sustainable cities and communities.
- Leicester is known for being welcoming and student-friendly, with a rich history and a diverse culture. It's been named the best city in the East Midlands to live and work (Good Growth for Cities Index, 2024).

Double your Advantage

English Requirements for International Students: IELTS 6.0

Note: Requirements also applicable to ODL programmes.

Master of Applied Psychology in Cyberpsychology (ODL)

Applied Psychology (non-practitioner):

- Bachelor's degree in Psychology with a minimum CGPA of 2.50, or its equivalent qualification as accepted by the Senate.
- Bachelor's degree in Psychology with a minimum CGPA of 2.00 and not meeting a CGPA of 2.50 can be accepted, subject to a rigorous internal assessment.
- Bachelor's degree in non-related fields with a minimum CGPA of 2.50 with a minimum 45 credits of prerequisites modules in Psychology or a graduate diploma in Psychology or its equivalent as accepted by accepted by the Senate.
- Bachelor's degree in non-related fields with a minimum CGPA of 2.50 and a Master's degree in Psychology with a minimum 45 credits of prerequisites modules in Psychology or a graduate diploma in Psychology or its equivalent as accepted by the Senate.
- Other related equivalent qualifications recognised by Malaysian government as equivalent to the above requirements

English Requirements for International Students: IELTS 5.5

Note: Recognised APEL-A Certification (T-7 Level)

APEL @ APU

Recognising Prior Learning. Empowering Lifelong Learning.

The Accreditation of Prior Experiential Learning (APEL) recognises the knowledge and skills you have acquired through work, professional practice, and lifelong learning. Whether you are seeking entry into higher education or credit exemptions, APEL provides an alternative pathway to achieving your academic goals.

	APEL.C (Credit Award)	APEL.Q (Access Qualification)
PURPOSE	Gain credit exemptions for subjects based on prior learning and work experience.	Gain entry by validating your industry experience.
WHO CAN APPLY?	Working adults with relevant work experience, professional certifications, industry training or prior learning.	Experienced Professionals/ Industry Expert.
BENEFITS	• Credit exemption (up to 60% subject to MQA) • Save time and tuition fees • Avoid repeating knowledge already mastered • Recognise workplace learning and professional certifications • Faster programme completion	• Alternative pathway into Higher Education • Recognises work experience and prior learning • Opportunity to obtain recognised qualifications • Supports lifelong learning • Career advancement
ASSESSMENT	• Portfolio Assessment/ Challenge Test	• Portfolio Assessment • Field Visit and Validation • Challenge Test • Capstone
OUTCOME	Receive credit exemptions for eligible modules.	Earn a recognised academic qualification.
RECOGNISES	✓ Work experience ✓ Professional practice ✓ Professional certifications ✓ Industry training ✓ Prior learning	✓ Work experience ✓ Professional achievements ✓ Industry expertise ✓ Prior learning

WHICH PATHWAY IS RIGHT FOR YOU?

CHOOSE APEL.C IF YOU...	OR	CHOOSE APEL.Q IF YOU...
✓ Are already eligible for admission. ✓ Want credit exemptions. ✓ Have relevant work experience or professional training.		✓ Gain entry by validating your industry experience. ✓ Have extensive work experience. ✓ Want an alternative pathway into higher education.

SAVE TIME
Complete your degree faster

SAVE COST
Reduce tuition fees and study costs

RECOGNISED
MQA-recognised pathway

ADVANCE YOUR FUTURE
Unlock new opportunities and career growth

Experience. Recognised. Future Ready.

Masters Degree Programmes

- Master of Science in Artificial Intelligence
- Master of Science in Cyber Security
- MSc in Data Science and Business Analytics
- Master of Science in Digital Transformation
- MSc in Software Engineering
- MSc in Information Technology Management
- Master of Technology Management
- Master of Business Administration
- Master of Business Administration with a specialism in:
  - *Digital Leadership*
  - *Artificial Intelligence (MBAi)*
  - *Hospitality and Tourism*
  - *Strategic HR Analytics*
  - *Business Analytics*
  - *Supply Chain Management*
  - *Oil and Gas Management*
- Master of Science in Digital Marketing
- Master in Digital Communication
- Master of Project Management
- Master of Science in Actuarial Science
- Master of Science in Actuarial Science with a specialism in:
  - *Economics*
  - *Business Analytics*
- Master of Finance
- Master of Finance with a specialism in FinTech
- Master of Accounting
- Master of Accounting in Forensic Analysis
- Master of Arts in Design Innovation Management
- Master of Education in Learning Design and Technology
- Master of Science in Computing
- Master of Philosophy in Management
- Master of Philosophy in Engineering
- Master of Philosophy in Immersive Technologies and Video Games Studies

Master of Science in Artificial Intelligence

Artificial Intelligence is among the important key areas of focus in the era of Industrial Revolution 4.0. Application concepts and skill sets in areas such as Machine Learning, Natural Language Processing (NLP) & Automation are among the key deliverables of this programme, placing you at the forefront of technology, shaping you to be a part of the most demanded workforce of the future.

Global agentic AI market reaches $199.05 billion by 2034

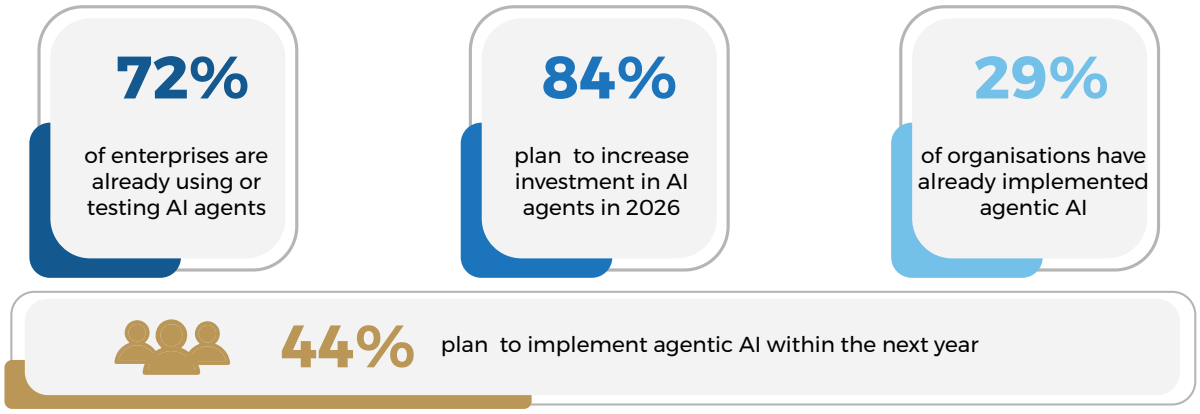

The industry is experiencing unprecedented expansion. According to Precedence Research, the global agentic AI market size will grow from USD 7.55 billion in 2025 to nearly USD 199.05 billion by 2034, with an expected CAGR of 43.84% from 2025 to 2034.

Source: https://www.precedenceresearch.com/agentic-ai-market

RAPID ADOPTION OF AGENTIC AI

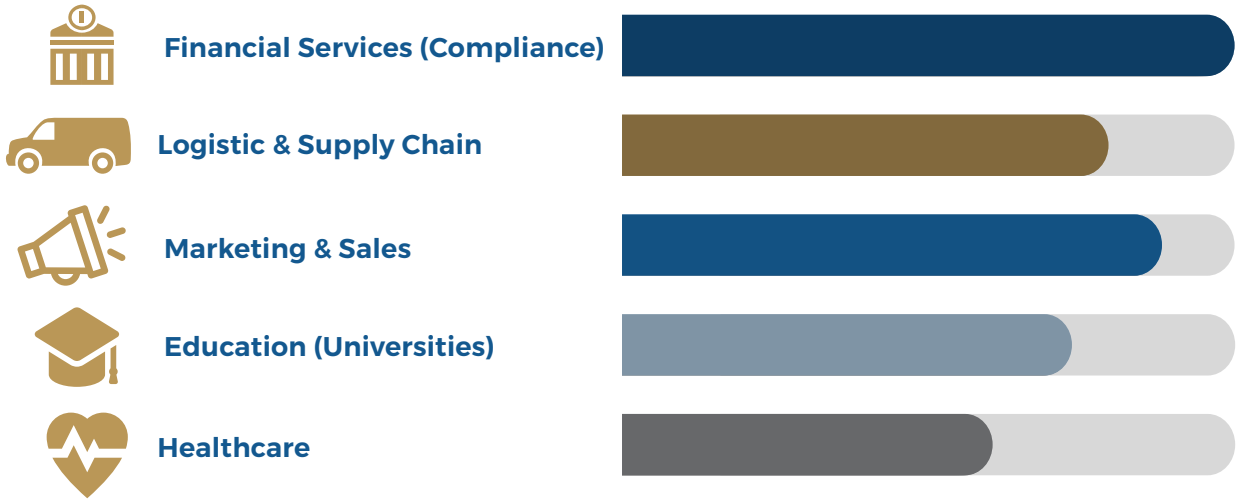

Enterprises are quickly embracing AI agents

Source: Zapier (2025) – AI Agents Survey: https://zapier.com/blog/ai-agents-survey

INDUSTRY ADOPTION SNAPSHOT

Adoption is strongest in data-rich, process-driven industries.

Source: WorldMetrics Agentic AI Statistics 2026

"Malaysia demonstrates strong workforce readiness for AI adoption, which is a key enabler for Agentic AI. Around 79% of employees in Malaysia use AI tools in their daily work. This is significantly higher than the global average (50%). High user adoption suggests that Malaysia has a digitally ready workforce, which is critical for scaling Agentic AI systems that require human-AI collaboration."

- The Star. (31 March 2026)

Source: https://www.thestar.com.my/starpicks/2026/03/31/seizing-agentic-ai-opportunity-in-msia

"The adoption of Agentic AI has accelerated significantly across industries. According to Zapier (2025), 72% of enterprises are already experimenting with AI agents, with 84% planning to increase investment in the coming years. Similarly, Blue Prism (2025) reports that 29% of organizations have already implemented agentic AI, while 44% are planning adoption within a year."

Master of Science in **ARTIFICIAL INTELLIGENCE**

DUAL DEGREE

(R/0613/7/0013)(06/29)(MQA/FA11933)

Duration:

Full-time - 1+ years

Part-time - 2.5-3 years

This programme is specifically designed to provide:

- Advanced skills and techniques in artificial intelligence
- Research opportunities to solve meaningful industrial problems with artificial intelligence techniques
- Advanced research opportunities in artificial intelligence in preparation for doctoral studies.

Career options

- Agentic AI Engineer
- AI Agent Developer
- AI Automation Architect
- Machine Learning Engineer
- AI Engineer
- AI Research Scientist
- Generative AI Engineer
- Data Scientist
- AI Solutions Architect
- Computer Vision Engineer
- Robotics AI Engineer
- NLP Engineer
- AI Consultant
- AI Product Manager
- Big Data Engineer

Agentic AI
AUTONOMOUS · INTELLIGENT · ACTIONABLE

Premier Digital Tech Institution

The Benefits of the Programme

Upon successful completion of this programme, you will be able to :

- Gain hands-on experience to implement Artificial Intelligence (AI) to solve problems
- Grasp knowledge on a wide range of subject matters ranging from Machine Learning, Robotics to Natural Language Processing.
- Effectively undertake and manage large scale and complex Artificial Intelligence (AI) projects.
- Engage in the design and implementation of Artificial Intelligence (AI) systems of high quality and reliability.
- Appreciate problems and suggest solutions associated with the development of Artificial Intelligence (AI) systems.
- Appreciate how an efficient Artificial Intelligence (AI) technology based infrastructure is a key factor in enabling a business to gain a competitive edge.
- Draw upon the body of knowledge and be able to overcome human limits to solve new problems using Artificial Intelligence (AI).

Who Should Attend

This programme is geared towards practicing IT/ Computing professionals within industry who seek further formal qualifications in Artificial Intelligence. In addition, professionals and managers who wish to enhance themselves with Artificial Intelligence knowledge and skills to postgraduate level will find this programme attractive. Fresh undergraduate students from Artificial Intelligence/ Software Engineering/ Data Science background will also find this programme worthwhile as a path to further enhance their academic qualifications.

Ride the Wave of Agentic AI

APU's Master of Science in Artificial Intelligence is leading the next wave of AI education by embedding Agentic AI as a core pillar of its curriculum, rather than as a standalone topic. Building on the foundations of Generative AI, students learn to design autonomous AI agents capable of planning, reasoning, making decisions, collaborating with other AI agents, and executing complex real-world tasks with minimal human intervention. The curriculum emphasises hands-on learning, industry-driven projects, and applied problem-solving, enabling students to develop practical expertise with the tools, frameworks, and technologies used in modern AI-powered enterprises. Through close collaboration with industry and a strong focus on deployment-ready skills, APU prepares graduates who are not only technically proficient but also equipped to drive innovation and lead the next generation of AI transformation.

- ***Explainable Artificial Intelligence***
- ***Intelligent Agents and Multi-Agent Systems***
- ***Generative Artificial Intelligence***

Modules & Project

This programme comprises 10 coursework modules and a Project. There are 7 compulsory Core Modules (including Research Methodology module) and you will have to choose 3 elective modules from those listed.

Pre-Requisite Modules (For Non-Computing Students)
Duration: 1 month (Full-time) / 4 months (Part-time)

- Programming in Python
- Database Fundamentals
- Fundamentals in Artificial Intelligence
- Statistics

Core Modules

- Artificial Intelligence
- Image Processing and Computer Vision
- Computational Intelligence Optimization
- Applied Machine Learning
- Deep Learning
- Natural Language Processing
- Research Methodology in Computing and Engineering
- Project Paper

Elective Module 1 (Choose 1)*

- Business Intelligence Systems **OR** Multivariate Methods for Data Analysis

Elective Module 2 (Choose 1)*

- Applied Robotics **OR** Explainable Artificial Intelligence

Elective Module 3 (Choose 1)*

- Intelligent Agents and Multi-Agent Systems **OR** Generative Artificial Intelligence

* Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules – however such changes may prolong the study duration.

Project Paper

You will be expected to conduct effective research in relation to Artificial Intelligence for both academic and industry purposes. Either route will require you to plan and conduct effective academic research, and produce one academic paper, consultancy report or academic paper in relation to an aspect of Artificial Intelligence.

Master of Science in Cyber Security

Rocheston Certified Penetration Tester

The **Rocheston Certified Penetration Tester (RCPT)** program stresses research, live labs and interactive sessions on emerging security findings, offering the scope for defining the information security requirements while finding options to enhance existing methodology assets. The RCPT certification is designed and embedded as part of **Advanced Ethical Hacking** module in the Master of Science in Cyber Security programme, to allow the students to have an industry-standard exposure towards penetration testing as well as an opportunity to upskill themselves in real-life scenarios and simulations through the offered CyberLabs. As such, every student in the programme is given equal opportunity in getting their hands on the certification as part of the syllabus learn in the module without the need of taking up additional training resources. Studen can opt for the Rocheston certification which is valid for 2 years and subject to a renewal process to ensure all Penetration Testers are updated with the current scope of Penetration Testing.

Certified Hacker Forensics Investigator (CHFI)

Upon completion of the **Advanced Digital Forensics** module, students will be ready and may opt for the **Certified Hacker Forensics Investigator (CHFI)** professional certification. The CHFI certification is provided by the International Council of Electronic Commerce Consultants [EC-Council], which is an American organisation that offers cybersecurity certification, education, training, and services in various cybersecurity skills. EC-Council is d headquartered in Albuquerque, New Mexico, and has certified over 237,000 professionals from 145 countries (https://iclass.eccouncil.org/). CHFI is an advanced cybersecurity certification for forensic network security investigators.

Certified Security Operation Centre Analyst (CSOC)

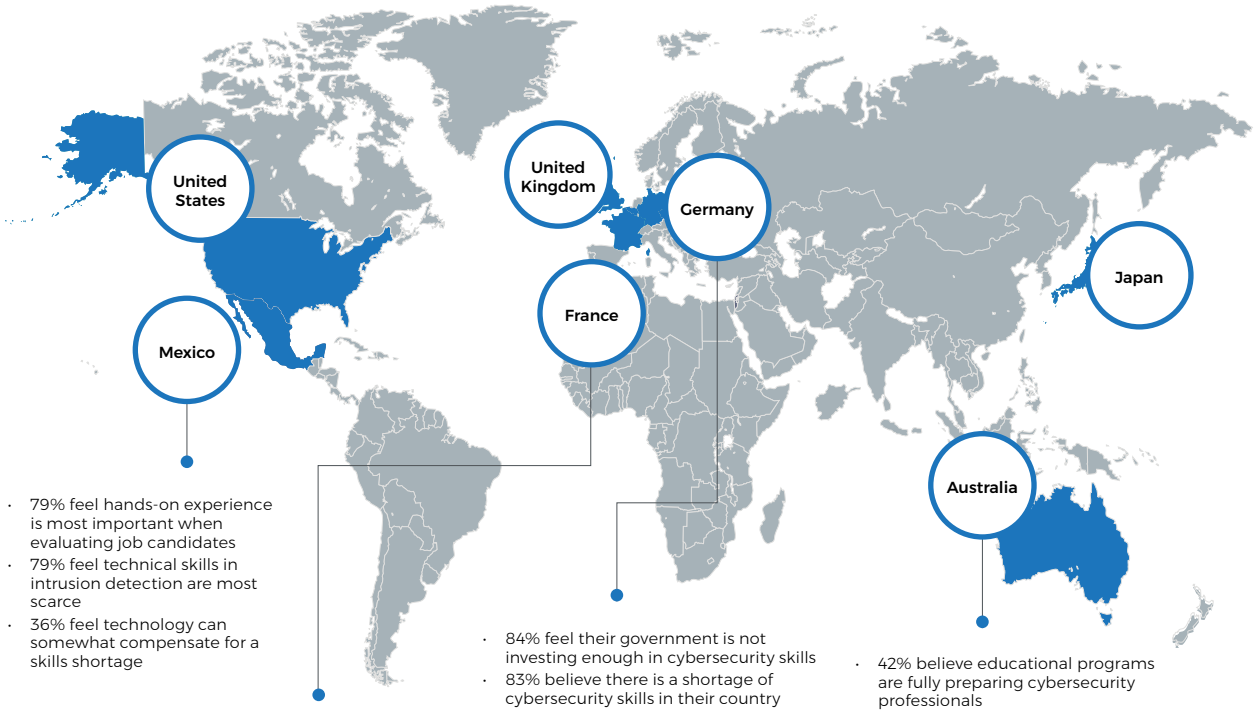

Upon completion of the **Security Operations Center (SOC) & Incident Response** SOC module, students will be ready and may opt for the **Certified Security Operation Center (CSOC)** professional certification. The CSOC examination is certified by the Global ACE Certification where the certification body for the Global ACE Certification is the Information Security Certification Body or ISCB, a department within CyberSecurity Malaysia (CSM). Candidates can take the examination at authorised examination centres in participating member countries. Candidates who have successfully passed the CSOC examination will be eligible to apply as an associate or professional member by fulfilling the membership criteria defined under the Global ACE Certification.

Global Cybersecurity Skill Shortage + Increased Budgets =

CAREER OPPORTUNITIES

Master of Science in **CYBER SECURITY**

DUAL DEGREE

(R/0613/7/0019)(05/29)(MQA/FA11934)

Duration:

Full-time - 1+ years

Part-Time - 2.5-3 years

This programme is specifically designed to provide:

- Opportunity for professional development at an advanced level within the area of Cyber Security.
- Ability to further develop specialisation gained in taught modules through an extensive research-based and/or technical-based dissertation, to prepare a subject matter expert in the field.
- APU is also poised to become a frontrunner in cyber security research through the establishment of the Forensics and Cyber Security (FSEC) Research Centre, through which research activities will be undertaken to challenge boundaries in the application of cyber security.

Career options

- Security Architect
- Cyber Security Analyst / Consultant
- Information Security Analyst
- Cyber Security Incident Response Consultant
- Digital Forensic Investigator
- Cyber Security Engineer
- Information Security Engineer
- Cyber Security Manager
- Information Security Manager

Certification by:

Premier Digital Tech Institution

The Benefits of the Programme

- The curriculum covers a wide range of industry relevant subject areas in Security Operations Centre (SOC) and Incident Response, Security Auditing and Assessment, Advanced Ethical Hacking, E-Investigation, Data Analytics in Cyber Security etc.
- External reviews conducted by Cyber Security Malaysia (CSM), KPMG and F-Secure during the development of the programme curriculum.
- Programme Support by an Industry Advisory Panel involving cyber security experts from Cyber Intelligence, Cyber Test Systems, Akati Consulting Group and Cyber Security Malaysia (CSM).
- A fully-functional Security Operations Centre (SOC) that allows students to have hands-on cybersecurity operations platform to monitor live data which allows them to perform real-time cyber security monitoring to fortify network defense with global threat intelligence and launching faster response on cyber security incidents.
- A full-fledged Cyber Threats Simulation and Response Centre – Cyber Range is also included within the Cyber Security Talent Zone in APU. Cyber Range incorporates latest technologies and a military grade cyber-defence system, enabling students to understand and formulate defence strategies, and practice the entire chain of cyber defence, while preparing them to deal with real cyber threat attack when it happens.
- A technical project related to Cyber Security as dissertation in the final semester.
- Research opportunities for students via APU's Forensic and Cyber Security Research Centre - FSEC.

Who Should Attend

This programme is geared towards practicing IT/ Computing professionals within industry who seek further formal qualifications in Cyber Security. In addition, professionals and managers who wish to enhance themselves with Cyber Security knowledge and skills to postgraduate level will find this programme attractive. Fresh undergraduate students from Cyber Security/ Digital Forensics background will also find this programme worthwhile as a path to further enhance their academic qualifications.

Modules & Project

This programme comprises 10 coursework modules and a Project. There are 7 compulsory Core Modules (including Research Methodology module) and you will have to choose 3 elective modules from those listed.

Pre-Requisite Modules (For Non-Computing Students)

Duration: 1 month (Full-time) / 4 months (Part-time)

- Programming in Python
- Database Fundamentals
- Digital Forensics and Cyber Security Tools

Core Modules:

- Applied Machine Learning in Cyber Security
- Information Security Design
- Cyber Security & Threats
- Security Operations Center & Incident Response
- Advanced Ethical Hacking
- Advanced Digital Forensics
- Research Methodology in Computing & Engineering
- Project Paper

Elective Modules (Choose 3)*

- E-Investigation
- Network Design & Performance
- Information Security Architectures
- Security Audit and Assessment
- Artificial Intelligence

* Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules – however such changes may prolong the study duration.

Project Paper

As part of this course, you are expected to complete an extensive project paper in relation to Cyber Security for both academic and industry purposes. This project paper will be supervised by a member of academic staff as the main supervisor. It may involve working with an external organisation (probably directly relevant to your work or organisation or any of our industry partners). You are given considerable flexibility in choosing any Cyber Security related topics to base your project paper. As for the deliverables, you are required to come up with a prototype/ simulation/ framework etc. (the list is just an example and not limited to only these) and to produce one project paper and a publishable conference/ journal paper consists of summary of the work.

MSc in Data Science and Business Analytics

THE MARKET GAP FOR DATA SCIENTISTS & BUSINESS ANALYSTS

HIGH DEMAND. SKILL SHORTAGE. MASSIVE OPPORTUNITY.

As AI adoption and digtial transformation accelerate globally, organisations are struggling to find skilled professionals who can turn data unto strategic business decisions.

KEY MARKET GAP INSIGHTS (2026)

34%

The U.S. Bureau of Labour Statistics projects 34% growth in Data Scientist jobs from 2024-2034, one of the fastest-growing professions globally.

Source: BLS 2024

35%

Demand for data-related roles is expected to grow by around 35% this decade, while talent supply may lag by 30-40% by 2027.

Source: LinkedIn 2024

250,000

Reports indicate a global shortage of AI and analytcis talent, including approximately 250,000 data scientists. Hybrid roles take significantly longer to fill.

Source: Integrate.io 2024

50%

McKinsey forecast that demand for Data Scientists in the U.S. alone could exceed supply by more than 50% by 2026.

Source: McKinsey 2024

WHAT COMPANIES NEED MOST

- √ Interpret busines problems
- √ Use AI and analytics tools
- √ Translate data into business strategies
- √ Communicate insights to management

DATA SCIENTISTS & BUSINESS ANALYSTS- MARKET OPPORTUNITY

Data Science @ APU - FORTIFIED through PARTNERSHIPS

The programme has been carefully designed by APU with inputs and content from our partners, comprising major technology and software solutions providers, university partners as well as industry organisations who use analytics for strategic and competitive advantage.

The strength of these partnerships ensures that the programme comprehensively addresses all key stakeholders – Technology providers, Employers, Government as well as Students – in its learning outcomes, curriculum content, delivery and assessment. Students also obtain certification jointly issued with industry partners, which would certainly give them a head start in the exciting world of Big Data.

Furthermore, APU is also poised to become a frontrunner in analytics research through the establishment of the Asia Pacific Centre of Analytics (APCA), through which research activities will be undertaken to challenge boundaries in the application of analytics.

Professional Certificate of Achievement

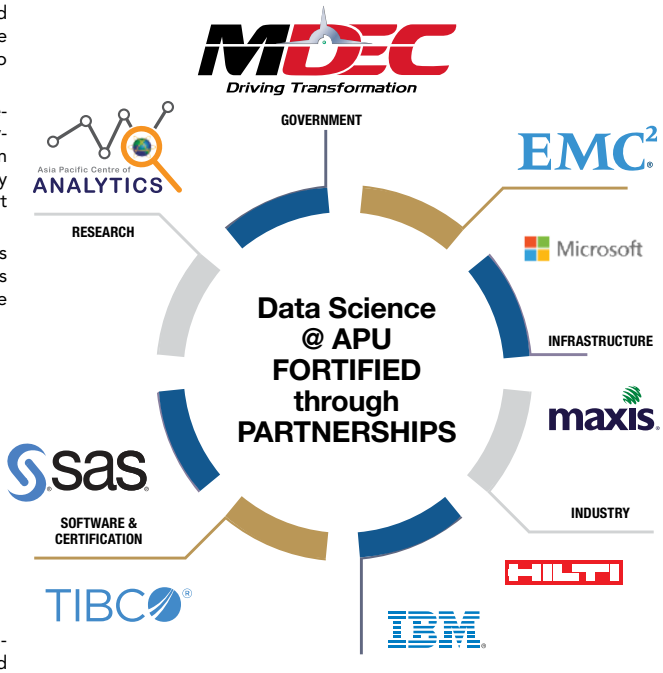

This document certifies that

Hema Latha Krishna Nair

has successfully completed the postgraduate curriculum in

Data Science & Business Analytics

Graduates from this programme will not only gain an academic qualification from APU, but would also automatically attain a Globally Recognised Professional Industry Certification from SAS. Along the way, graduates would also gain exposure to industrial workshops led by experts from the industry, providing a valuable gateway into future careers.

MSc in **DATA SCIENCE AND BUSINESS ANALYTICS**

DUAL DEGREE

(R2/0614/7/0007)(10/30)(MQA/FA8020)

Duration:

Full-time - 1+ years

Part-time - 2.5-3 years

This programme is specifically designed to provide:

- Knowledge and applied skills in data science, big data analytics and business intelligence.
- Overall understanding of the impact of data science upon modern processes and business.
- Exposure towards data science tools and techniques, as well as methods of data collection and utilisation, to turn data into useful information via various processes.

Career options

- Data Engineers
- Data Analyst
- Business Analyst
- Data Scientist
- Chief Technology Officer (CTO)
- Data Analytics Manager
- Business Analyst Manager
- Data Innovation Manager
- Machine Learning Scientist
- Business Process Engineer
- Data Wrangler / Munger / Miner
- Business Intelligence Manager
- Analytics & Reporting Manager
- Decision Analytics Manager
- Data Architect

MD™ Premier Digital Tech Institution

The Benefits of the Programme

- In addition to the degree award, a Joint Professional Certification will be offered by SAS Institute, USA.
- 30% of the curriculum will allow for mini projects assessed as in-course work allowing for practical skills development in Data Analytics.
- The curriculum covers a wide range of subject matter from Analytical Technologies, Exposure to tools such as R & SAS Modelers, Data Visualisation, Customer/User Behavioural Studies, Forecasting Methods and to Presenting the Business Intelligence reports.
- External Programme Annual Reviews by International University Partners.
- Programme Support by an Industry Advisory Panel involving data analytical experts from Petronas ICT, RedTone, SharePoint, CyberSecurity Malaysia, Maxis, IBM, Microsoft, Fusionex and Axiata.
- Research opportunities via APU's Centre of Analytics - APCA.

Who Should Attend

This programme is designed to provide students with knowledge and applied skills in data science, big data analytics and business intelligence. It aims to develop analytical and investigative knowledge and skills using data science tools and techniques, and to enhance data science knowledge and critical interpretation skills. Students will understand the impact of data science upon modern processes and businesses, be able to identify, and implement specific tools, practices, features and techniques to enhance the analysis of data.

POWER of Analytics and Data Driven Marketing

Modules & Project

This programme comprises 11 coursework modules and a Capstone Project (2 parts). There are 8 compulsory Core Modules (including Research Methodology module) and you will have to choose 1 pathway (3 specialisation modules).

Pre-Requisite Modules (For Non-Computing Students)
Duration: 1 month (Full-time) / 4 months (Part-time)
- Programming in Python
- Database Fundamentals
- Statistics

Core Modules
- Big Data Analytics & Technologies
- Data Management
- Multivariate Methods for Data Analysis
- Applied Machine Learning
- Research Methodology for Capstone Project
- Natural Language Processing
- Data Analytical Programming
- Advanced Business Analytics and Visualisation
- Capstone Project 1
- Capstone Project 2

Specialisation Modules*
(Choose 1 Pathway only)

Pathway 1 (Business Intelligence):
- Business Intelligence Systems
- Time Series Forecasting
- Behavioural Science, Social Media and Marketing Analytics

OR Multilevel Data Analysis
OR Operational Research and Optimization

Pathway 2 (Data Engineering):
- Cloud Infrastructure and Services
- DataOps and Production Machine Learning
- Deep Learning

OR Intelligent Agents and Multi-Agent Systems
OR Data Protection and Management

* Specialisation modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules - however such changes may prolong the study duration.

sas

SAS certification is awarded to students who complete:
- Data Management
- Data Analytical Programming
- Advanced Business Analytics and Visualisation

Master of Science in DIGITAL TRANSFORMATION

DUAL DEGREE

(N/0688/7/0001)(08/28)(MQA/FA16559)

Duration:

Full-time - 1+ years

Part-time - 2.5-3 years

This programme is specifically designed to provide:

- Graduates with knowledge, skills, and competencies that will help in the development of the country and enable them to progress their careers in digital transformation.
- An understanding of digitally connected systems in organizations that automate manual tasks, streamlining workflows, enhancing efficiency, and improving customer experience.
- An opportunity to develop capabilities in implementing digital transformation initiatives effectively, empowering organisations agility and innovation to quickly respond to customer and competitor demands.
- A comprehensive knowledge in identifying digital technologies, their applications in various industries, and leadership qualities.

Career options

- Digital Transformation Specialist
- Digital Transformation Manager
- Digital Transformation Consultant
- Data Transformation Officer
- Chief Digital Officer (CDO)
- Chief Technology Officer (CTO)
- Digital Transformation Director
- Director of Digital Strategy
- Head of Strategy and Transformation
- Digital Transformation Lead
- Digital Transformation Programme Integrator
- Digital Project Manager

Premier Digital Tech Institution

The Benefits of the Programme

- Develop skills to conduct business consultation in digital transformation projects by engaging with customers and understanding their needs.
- Apply the concepts in technologies relevant to industrial revolution 4.0 to develop or redesign new business processes that can improve productivity and efficiency while preparing companies for AI adoption.
- Master design thinking principles on change management to build strategic working relationships and meet potential customers expectations.
- Examine digital engagement platforms requirement in meeting customers needs.
- Analyse business trends in digital platforms to grow new business or cross sell additional products or services.
- Prepare students who are not from a computing background to develop the necessary knowledge to undertake digital transformation projects within their expertise.

Who Should Attend

This programme is geared towards industry or business professionals who are seeking to develop their careers in the digital transformation for the benefit of organisations. Managers within organisations where information technology plays a vital role in the managerial functions and the efficient operation of the organisation will find this programme very useful.

For business managers who want to leverage on power of cloud services to increase efficiencies in business operations, they will learn different digital transformation frameworks and decide on the ones most applicable to their industries. Though they may not have any IT background, pre-requisite modules in key areas of AI, programming and internet of things will be taught to help them navigate the IT landscape.

Modules & Project

This programme comprises 10 coursework modules and a Project. There are 7 compulsory Core Modules (including Research Methodology module) and you will have to choose 3 elective modules from those listed).

Pre-Requisite Modules (For Non-Computing Students)

Duration: 1 month (Full-time) / 4 months (Part-time)

- Programming in Python
- Database Fundamentals
- Fundamentals in Artificial Intelligence

Core Modules

- Business Intelligence Systems
- Disruptive Innovation Strategies
- Technology, Culture and People: A Global Perspective
- Leading Digital Business Transformation
- Digital Project Management
- IR 4.0 Enabling Technologies
- Research Methodology in Computing and Engineering
- Project Paper

Elective Modules (Choose 3)*

- Building IOT Application
- Financial Technology
- Cyber Security & Threats
- Big Data Analytics and Technologies

* Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester OR among the intensive delivery modules – however such changes may prolong the study duration.

Project Paper

You are required to complete an industry-based major project where possible, however the emphasis must be placed on an effective demonstration of how the application of digital transformation can be part of the business environment. It is expected that the project would devise, recommend, or implement innovative solutions to the problem areas.

MSc in **SOFTWARE ENGINEERING**

DUAL DEGREE

(R/0612/7/0002)(02/27)(MQA/FA8836)

Duration:

Full-time - 1+ years

Part-time - 2-3 years

This programme is specifically designed to provide:

- An opportunity for professional development at an advanced level within the area of software engineering.
- Enhancement of skills and knowledge in specialist areas for practising IT professionals.
- The ability to undertake large-scale IT software development projects.
- The skills necessary to participate effectively in the design and implementation of software systems of high quality and reliability.

Career options

- Project Manager
- Software Architect
- Senior Software Developer
- Solutions Architect
- Software Engineer
- Software Consultant
- Chief Technology Officer (CTO)
- Development Manager
- Senior System Designer
- Application Engineer
- Software Test Engineer
- Software Quality Assurance (QA) Specialist
- R&D Specialist
- Senior Technical Lead
- Product Specialist

MD™ Premier Digital Tech Institution

The Benefits of the Programme

Upon successful completion of this programme, you will be able to:

- Undertake and effectively manage largescale and complex software development projects.
- Consider reliability and quality in the design of software systems
- Determine the security requirements for computer systems
- Apply and critique quality metrics in the assessment of software systems
- Participate in the design and implementation of high quality and reliable software systems
- Appreciate problems and suggest solutions associated with the development of software systems.
- Contribute to the advancement and development of software engineering theories and practices.
- Appreciate how an efficient technology based infrastructure is a key factor in enabling a business to gain a competitive edge.

Who Should Attend

This programmne aims to develop specialist knowledge in the domain of Software Engineering (SE). It exposes students to the core principles and processes of SE fundamental to the successful development of systems capable of addressing emerging business needs. Students will have the opportunity to supplement their knowledge through elective modules in domain adjacent topics such as natural language processing, data management and big data analytics.

This programme is geared towards practicing software engineers within industry who seek formal qualifications in software engineering. In addition, IT professionals and managers who wish to upgrade their technical software engineering knowledge and IT skills to post-graduate level will find this programme attractive.

Modules & Project

This programme comprises 10 coursework modules and a Project.

There are 7 compulsory Core Modules (including Research Methodology module) and you will have to choose 3 elective modules from those listed.

Pre-Requisite Modules (For Non-Computing Students)
Duration: 1 month (Full-time) / 4 months (Part-time)

- Programming in Python
- Database Fundamentals
- Systems Development Methods

Core Modules

- Managing Software Development Projects
- Reliability Management
- Object Oriented Software Systems Engineering
- Software Engineering Support Environments
- Software Quality Engineering
- Security Technologies
- Research Methodology in Computing and Engineering
- Project Paper

Elective Modules (Choose 3)*

- Internet Applications
- Network Design & Performance
- Data Management
- Big Data Analytics and Technologies
- Natural Language Processing

* Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules – however such changes may prolong the study duration.

Project Paper

You are required to complete industry-based major projects that are directly relevant to your work and your organisation or any substantial idea from the modules taken.

The project emphasis should involve the derivation of criteria for the selection of software engineering processes, methods and tools. It would be expected that a software prototype, review of current practices or specifications should be produced.

MSc in **INFORMATION TECHNOLOGY MANAGEMENT**

DUAL DEGREE

(R/0611/7/0012)(07/27)(MQA/FA8835)

Duration:

Full-time - 1+ years

Part-time - 2.5-3 years

This programme is specifically designed to provide:

- An opportunity to demonstrate how the application of computer-related technology is an integral part of an efficient business environment.
- An emphasis on the understanding of how an effective computer system is a key factor in enabling a business to gain a competitive and strategic edge.
- An overall consideration of how IT can be managed in the organisation.
- An understanding of how strategic IT frameworks can be established to enhance the capability of the organisation.

Career options

- Senior IT Consultant
- IT Recruitment Consultant
- IT Manager
- IT Project Manager
- Technical Support Manager
- Chief Technology Officer (CTO)
- Chief Information Officer (CIO)
- IT Infrastructure Manager
- Innovation Manager
- IT Director

Premier Digital Tech Institution

The Benefits of the Programme

Upon successful completion of this programme, you will be able to:

- Demonstrate professional competencies in one or more specialist branches of IT Management.
- Draw upon the body of theoretical and technical knowledge available and be able to use this to professional advantage.
- Communicate effectively in technical and professional environments.
- Show initiative and independence of thought in technical project planning and design.
- Appreciate how an efficient technology-based infrastructure is a key factor in enabling a business to gain a competitive edge.
- Demonstrate a critical awareness of the importance of IT in the development of systems.
- Develop an appreciation of the management context within which software and IT systems are developed.
- Critically analyse, design and evaluate possible developments in a specialised area of discipline in order to further the knowledge and understanding of an IT management environment.

Who Should Attend

This programme is geared towards industry or business professionals who are seeking to develop their careers in the management of technological systems and/or their production for the benefit of organisations. Managers within organisations where information technology plays a vital role in the managerial functions and the efficient operation of the organisation will find this programme very useful.

Modules & Project

This programme comprises 10 coursework modules and a Project.

There are 7 compulsory Core Modules (including Research Methodology module) and you will have to choose 3 elective modules from those listed.

Pre-Requisite Modules (For Non-Computing Students)
Duration: 1 month (Full-time) / 4 months (Part-time)

- Programming in Python
- Database Fundamentals
- Systems Development Methods

Core Modules

- Managing Software Development Projects
- Technology Management
- Digital Execution
- Strategic Planning and Systems Development
- Business Intelligence Systems
- Research Methodology in Computing and Engineering
- Managing Organisations
- Project Paper

Elective Modules
(Choose 1)*

- Big Data Analytics & Technologies
- Information Security Design

(Choose 2)*

- Information Security Architectures
- Network Design & Performance
- Data Management

* Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules – however such changes may prolong the study duration.

Project Paper

You are required to complete industry-based major projects where possible, however the emphasis must be placed on an effective demonstration of how the application of computer-related technology can be part of the business environment. It is expected that the project would devise, recommend or implement innovative solutions to the problem areas.

Master of **TECHNOLOGY MANAGEMENT**

DUAL DEGREE

(R/0414/7/0107)(06/27)(MQA/FA8837)

Duration:
Full-time - 1+ years

This programme is specifically designed to provide:

- An opportunity to understand and appreciate the combination of technology with management.
- A platform to produce capable managers who can effectively manage the dynamic changes that technology makes at all levels.
- An understanding of the needs of management in decision-making.
- An overall appreciation of the manner in which an organisation's strategic business plan drives its technology strategy and infrastructure.

Career options

- Business IT Consultant
- BPR Manager
- Business Strategy Consultant
- Chief Technology Officer (CTO)
- Chief Information Officer (CIO)
- Product Manager
- IT Manager
- IT Project Manager
- IT Consultant
- System Analyst
- Technology Consultant

Premier Digital Tech Institution

The Benefits of the Programme

Upon successful completion of this programme, you will be able to :

- Demonstrate professional competencies in one or more specialist branches of Technology Management.
- Draw upon the body of theoretical and technical knowledge available and be able to use this to professional advantage.
- Communicate effectively in technical and professional environments.
- Show initiative and independence of thought in technical project planning and design.
- Appreciate how an efficient technology-based infrastructure is a key factor in enabling a business to gain a competitive edge.
- Illustrate how technology can support strategies to enhance corporate goals.
- Critically analyse, design and evaluate possible developments in a specialised area of discipline in order to further the knowledge and understanding of a technology management environment.

Who Should Attend

This programme is geared towards graduates from technical programmes such as engineering and computer science who wish to master managerial skills that are relevant to their background. This programme also appeals to non-technical managers and executives who are increasingly required to manage technology and technical personnel as part of their managerial responsibilities. Graduates seeking senior management careers in high technology or technology intensive businesses are also encouraged to enroll in this programme.

Modules & Project

This programme comprises 10 coursework modules and a Project. There are 8 compulsory Core Modules (including Research Methodology module) and you will have to choose 2 elective modules from those listed).

Pre-Requisite Modules (For Non-Business Students)
Duration: 1 month (Full-time)

- Managing People
- Understanding Customers
- Managerial Finance
- Business Environment & Strategic Planning

Core Modules

- Managing Creativity and Innovation
- Business Intelligence Systems
- New Product Development & Innovation
- Statistical Decision Making
- Research Methodology in Computing and Engineering
- Technology Management
- Technology, Culture and People : A Global Perspective
- Entrepreneurship in Asia
- Project Paper

Elective Modules (Choose 2)*

- Digital Execution
  OR Data Management
- Strategic Marketing Management
  OR Marketing and Sustainability in the Age of Globalisation

* Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules – however such changes may prolong the study duration.

Project Paper

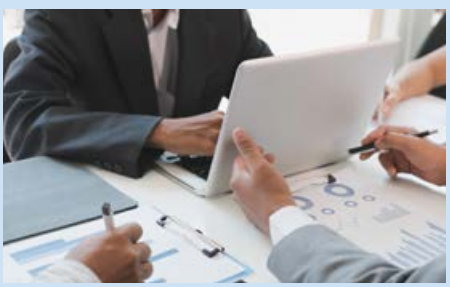

You are required to complete industry-based major projects where possible, however the emphasis must be placed on an effective demonstration of how the application of computer-related technology can be part of the business environment. It is expected that the project would devise, recommend or implement innovative solutions to the problem areas.

Master of Business Administration

MASTER OF BUSINESS ADMINISTRATION - MORE THAN JUST AN MBA

In today's digital economy, business leaders need more than traditional management expertise. APU's MBA combines core business knowledge with digital, analytical, and technology management skills to prepare graduates for leadership in a rapidly evolving business environment. Students can further enhance their expertise through specialism in Digital Leadership, Business Analytics, Strategic HR Analytics, Supply Chain Management, Hospitality and Tourism, Artificial Intelligence (MBAi), or Oil and Gas Management.

- **Master of Business Adminsitration**
- **Master of Business Administration with a specialism in:**
  - *Digital Leadership*
  - *Artificial Intelligence (MBAi)*
  - *Hospitality and Tourism*
  - *Strategic HR Analytics*
  - *Business Analytics*
  - *Supply Chain Management*
  - *Oil and Gas Management*

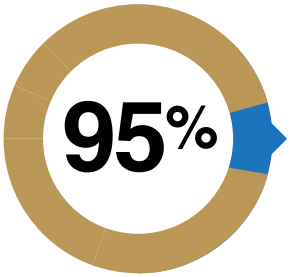

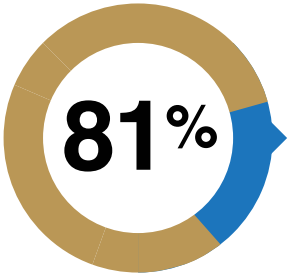

"MBA GRADUATES CONTINUE TO COMMAND A SALARY PREMIUM COMPARED TO DIRECT FROM INDUSTRY HIRES AND BACHELORS DEGREE HIRES" - GRADUATE MANAGEMENT ADMISSION COUNCIL (GMAC) SURVEY

"Demand for MBA talent is strongest in Asia Pacific"

- Graduate Management Admission Council (GMAC) Survey

of business school graduates stated that their MBA degree was beneficial personally even during recession time" - Graduate Management Admission Council (GMAC) Survey

of companies plan to hire MBA graduates" - Graduate Management Admission Council (GMAC) Survey

"Typically, those applicants with a Master's degree or MBA will be hired with one or two grades higher than degree holders... about an 8% higher salary depending on the field or industry they plan to join".

- Lee Chun Keat
Director of Engineering, Oppstar Malaysia

The MBA is a popular platform for career progression (Lessler, 2018), providing students with a set of transferable skills and knowledge to allow them to lead and make decisions in management positions. With its emphasis on personal growth, networking and challenging complexity, MBA graduates are well prepared for the future jobs market and the continued demand for MBA talent.

"Information is the oil of the 21st century, and analytics is the combustion engine."

- Peter Sondergaard,
Senior Vice President, Gartner Research (2014)

POWER
of Analytics and Data Driven Marketing

TESTIMONIALS BY OUR MBA GRADUATES

"Driven by state of the art technology on all fronts and boasting of a well-equipped faculty, I was conditioned and nurtured in a way that has helped me thrive in some of the most challenging environments ever since I graduated with a MBA."

- Arjun Narayanan
Content Manager, IIMResume, India

"APU's environment well adapted for students' needs and wants. I learned how to be optimistic and to be a fast learner. It was undoubtedly a life changing experience."

- Kanat Zhumanov
Chief Manager of the Board Office of "University Medical Center" Corporate Fund in Nur-Sultan City, Kazakhstan

Master of **BUSINESS ADMINISTRATION**

DUAL DEGREE

(R/0414/7/0094)(06/27)(MQA/FA8762)

- Research Methodology
- Entrepreneurship
- Digital Marketing Tools and Trends
- Project

Specialisation Modules

- Business Intelligence Systems
- Big Data Analytics and Technologies
- Time Series Analysis and Forecasting

Project

You will be expected to conduct effective research in relation to your area of specialisation (Business Analytics) for both academic and industry purposes. Either route will require you to plan and conduct an effective individual research and analysis, leading to a significant academic paper, consultancy report or case history in relation to an aspect of business.

Master of **BUSINESS ADMINISTRATION** WITH A SPECIALISM IN ARTIFICIAL INTELLIGENCE (MBAi)

DUAL DEGREE

(R/0414/7/0094)(06/27)(MQA/FA8762)

Duration:

Full-time - 1+ years

Part-time - 2.5-3 years

This programme is specifically designed to provide:

- A solid grounding in core management disciplines, integrated with specialised modules in artificial intelligence and emerging technologies.
- The ability to harness AI-driven insights to make strategic, data-informed decisions across diverse business functions.
- A comprehensive understanding of AI applications in areas such as operations, marketing, finance, and customer experience.
- The skills to lead digital transformation initiatives, manage AI projects, and align technological innovation with business goals.

Career options

- AI Integration Specialist
- AI Product Manager
- AI innovation Manager
- AI Strategy Consultant
- Business Intelligence Analyst
- Business Development Manager
- Business Intelligence (BI) Manager
- Digital Transformation Lead
- AI Strategy Consultant
- AI Strategy Manager
- Chief AI Officer

Premier Digital Tech Institution

Note: The specialism will appear only in the academic transcript.

The Benefits of the Programme

No Exams
100% Courseworks/ Assignments

Upon successful completion of this programme, you will be able to:

- Gain a competitive edge in the job market with specialised skills tailored to the AI industry and its applications across various sectors.
- Develop, manage, and optimise AI-driven solutions to address complex business challenges and enhance operational efficiency.
- Apply AI technologies and platforms to solve real-world problems.
- Design and implement AI strategies to drive business innovation, improve decision-making, and unlock new value propositions.
- Prepare for leadership roles in both local and global organisations, with the ability to lead AI adoption and digital transformation initiatives.
- Exhibit innovative problem-solving skills, using AI to address industry-specific challenges and capitalize on emerging opportunities.
- Demonstrate strong analytical and decision-making capabilities to support strategic planning and execution in AI-driven projects and business processes.

Who Should Attend

The MBAi programme is purpose-built for forward-thinking professionals and managers who aspire to lead at the intersection of business strategy and cutting-edge technology. Designed to equip you with advanced leadership and AI expertise, this programme empowers you to drive innovation, lead digital transformation, and make data-driven decisions in a rapidly evolving global economy. Whether you're aiming to accelerate your career into senior executive roles, pivot into AI-powered industries, or launch your own AI-driven venture, the MBAi provides a powerful blend of business acumen and AI specialisation. You'll gain hands-on experience with real-world AI applications and develop the strategic mindset needed to thrive in high-impact roles.

POWER of Analytics and Data Driven Marketing

Modules & Project

This programme comprises 13 coursework modules and a Project.

Pre-Requisite Modules (For Non-Business Students)
Duration: 1 month (Full-time) / 2 months (Part-time)

- Managing People
- Understanding Customers
- Managerial Finance
- Business Environment & Strategic Planning

Core Modules

- Organisational Behaviour
- Accounting & Finance for Managers
- Managerial Economics
- Technology Management
- Global Strategic Management
- Digital Marketing Tools & Trend
- Statistical Decision Making
- Entrepreneurship
- Human Resource Management
- Research Methodology
- Project

Specialisation Modules

- Computational Thinking for AI
- Business Intelligence Systems
- AI for Strategic Leadership

Project

You will be expected to conduct effective research in relation to your area of specialisation in Artificial Intelligence (AI) for both academic and industry purposes. Either route will require you to plan and conduct an effective individual research and analysis, leading to a significant academic paper, consultancy report or case history in relation to an aspect of business.

What sets APU's MBAi apart?

- Global Relevance: Explore AI's transformative impact across industries like healthcare, finance, retail, and manufacturing.
- Future-Ready Skills: Master predictive analytics, recommendation systems, AI-driven marketing, and intelligent automation.
- Career Versatility: Prepare for roles such as AI Strategy Consultant, Chief AI Officer, or Digital Transformation Lead.
- Innovation-Driven Learning: Tackle ethical challenges, lead AI adoption, and unlock new business models through AI.

This is more than an MBA — it's your launchpad into the future of intelligent business leadership.

Master of **BUSINESS ADMINISTRATION** WITH A SPECIALISM IN SUPPLY CHAIN MANAGEMENT

DUAL DEGREE

(R/0414/7/0094)(06/27)(MQA/FA8762)

Duration:

Full-time - 1+ years

Part-time - 2.5-3 years

This programme is specifically designed to provide:

- An opportunity to fulfil the demands of organisation's operating in today's dynamic market and addressing the challenges of the modern supply chain landscape, taking advantage of technological improvement and optimise supply chain processes.
- Ability to provide insights into analytics from a supply chain perspective, facilitating strategic decision-making related to design, sourcing and distribution.
- An overall awareness of sustainability and ethical considerations within supply chain management, emphasizing responsible sourcing and environmental impact awareness.

Career options

- International Logistics Manager
- Logistic and Supply Chain Manager
- Business Development Manager
- Business Consultant
- Supply Chain Analyst
- Chief Executive Officer (CEO)
- Chief Marketing Officer (CMO)
- Inventory Control Manager
- Entrepreneur
- General Manager
- Procurement Manager
- Project Manager

Premier Digital Tech Institution

Note: The specialism will appear only in the academic transcript.

The Benefits of the Programme

No Exams
100% Courseworks/ Assignments

Upon successful completion of this programme, you will be able to:

- Streamline and enhance supply chain operations to improve efficiency and reduce cost.
- Leverage technologies and tools to enhance supply chain visibility and empower organisation to make data-driven decisions.
- Integrate sustainability and ethical principles into supply chain management, promoting responsible sourcing and environmentally friendly practices.
- Develop leadership competencies to drive innovation and foster organisational transformation.
- Implement managerial strategies to ensure business continuity, even in challenging situations.
- Understand and critically analyse the supply chain challenges and disruptions.
- Effectively communicate towards different audiences and circumstances via a variety of communication tools and methods.
- Demonstrate the ability to learn independently and to take responsibility for continuing professional development.
- Demonstrate innovative problem-solving skills that are capable of tackling business management problems.
- Demonstrate intellectual, analytical skills and knowledge within the business and supply chain strategic management.
- Demonstrate the personal effectiveness through effective self-management within the professional environment.

Who Should Attend

This is designed for managers and professionals who want to advance their careers and deepen their expertise in supply chain and business management. This programme is ideal for individuals involved in procurement, sourcing, and vendor management who wish to enhance their skills in supply chain. Additionally, analysts and entrepreneurs who looking to specialise in supply chain data analysis and decision-making will benefit significantly. Essentially, this programme is suitable for a wide range of individuals, whether they have existing supply chain experience or are eager to enter this dynamic and challenging field.

POWER of Analytics and Data Driven Marketing

Modules & Project

This programme comprises 13 coursework modules and a Project.

Pre-Requisite Modules (For Non-Business Students)
Duration: 1 month (Full-time) / 2 months (Part-time)

- Managing People
- Understanding Customers
- Managerial Finance
- Business Environment & Strategic Planning

Master of **BUSINESS ADMINISTRATION** WITH A SPECIALISM IN OIL AND GAS MANAGEMENT

DUAL DEGREE

(R/0414/7/0094)(06/27)(MQA/FA8762)

Duration:

Full-time - 1+ years

Part-time - 2.5-3 years

This programme is specifically designed to provide:

- A strong foundation in core management principles, integrated with specialised modules focused on the oil and gas industry.
- The ability to generate data-driven insights and apply strategic thinking to solve real-world business challenges in the oil and gas sector.
- In-depth understanding of the technical, economic, and regulatory dynamics that shape the global oil and gas landscape.
- Leadership capabilities and a comprehensive grasp of best practices, preparing graduates to take on senior roles within the oil and gas industry.

Career options

- Energy Project Manager
- Supply Chain & Operations Manager
- Corporate Strategy Analyst
- Environmental Manager/Consultant
- Economist or Financial/Risk Analyst
- Oil & Gas Finance Analyst
- Business Development Manager
- Energy Technology Consultant
- Upstream Manager
- Corporate Strategy Manager (Energy Sector)

MD™ Premier Digital Tech Institution

Note: The specialism will appear only in the academic transcript.

The Benefits of the Programme

No Exams
100% Courseworks/ Assignments

Upon successful completion of this programme, you will be able to:

- Gain a competitive edge in the job market with specialised skills tailored to the oil and gas industries.
- Develop, manage, and optimise oil and gas operations while leveraging advanced technologies to improve efficiency and reduce costs.
- Apply industry-specific tools and techniques, including data analytics, digital transformation technologies, and sustainable energy practices.
- Design and implement effective strategies for oil and gas exploration, production, and distribution to maximize value while ensuring regulatory compliance.
- Prepare for leadership roles in both local and global oil and gas organisations, equipped with strategic, technical, and management expertise.
- Exhibit innovative problem-solving skills tailored to address unique industry challenges, such as resource management, environmental concerns, and market fluctuations.
- Demonstrate strong analytical and decision-making capabilities to support strategic planning and execution within the context of the oil and gas sector.

Who Should Attend

This programme is designed for managers and professionals aiming to advance their careers into senior managerial or executive roles within the oil and gas industry by acquiring advanced knowledge and leadership skills. An MBA in Oil and Gas Management is a specialised MBA designed to equip professionals with the strategic, operational, and financial skills needed to manage and lead in the global energy industry — especially in sectors related to exploration, production, refining, trading, and sustainable energy transition. It is also well-suited for individuals looking to transition into the energy sector, or those interested in managing or starting their own business within the oil and gas industry, providing a solid foundation in both business management and industry-specific practices. This programme is also ideal for those passionate about optimizing operational efficiencies and navigating the regulatory complexities within the energy sector. It offers the opportunity to engage with real-world challenges while leveraging global business opportunities in the oil and gas landscape.

Either route will require you to plan and conduct an effective individual research and analysis, leading to a significant academic paper, consultancy report or case history in relation to an aspect of business.

POWER of Analytics and Data Driven Marketing

Master of Science Digital Marketing

Marketing has always been about how to reach (and sell to) an audience. What has changed with technological changes, is where you find that audience. In the digital marketing industry, quotes often encapsulate the essence of product or service, customer experience, building customer relationship, and the importance of creativity and innovation. As a marketer, your job is never to "push a product onto an unwilling consumer." Instead, it's about understanding your audience thoroughly enough to craft messages, experiences, and campaigns that seamlessly connect their needs/pain points to your product.

> **"Digital marketing is not the art of selling a product. It is the art of making people buy the product that you sell."**
>
> *- Hecate Strategy*

Master of Science in **DIGITAL MARKETING**

Master in Digital Communication

The World Went Digital. Flow With It.

Communication is no longer an industry, it is the engine of every industry. With 5.79 billion social media user identities, nearly 70% of the planet is part of a conversation that never stops, and the audience keeps growing by 9.3 new users every second (DataReportal, 2026). The money has followed the audience: global advertising spend will cross US$1 trillion for the first time in 2026, with digital claiming almost 69% of every advertising dollar (eMarketer, 2026; Statista, 2026) and influencer marketing alone surging from US$1.7 billion in 2015 to more than US$40 billion in 2026 (Influencer Marketing Hub, 2025; Mordor Intelligence, 2026). Employment of public relations specialists is also projected to grow 5% from 2024 to 2034, generating around 27,600 openings every year, with the strongest prospects going to candidates with advanced skill and social media expertise (U.S. Bureau of Labor Statistics, 2025). Behind every campaign, every crisis, and every data-driven communication decision is a communication professional, and the world needs more of them. The Master in Digital Communication at APU is designed to equip you to meet the need of the evolving communication industry where you will made ready to ride the waves of communication technology and to lead.

5.79 Billion +

People participate in digital conversations worldwide

- DataReportal, 2026

USD 480 Billion

Creator economy by 2027 — nearly double its 2023 size

- Goldman Sachs, 2023

27,600+

PR & communication job openings every year (2024-2034)

- U.S. Bureau of Labor Statistics, 2025

98%

Internet penetration in Malaysia — 85% of Malaysians on social media

- DataReportal, 2026

Master in **DIGITAL COMMUNICATION**

DUAL DEGREE

(N/0323/7/0024)(07/30)(MQA/PA18240)

- Advanced Business Analytics and Visualization

Project

You will be expected to demonstrate an ability to plan and undertake a research programme, to undertake a thorough investigation of their chosen area of study, to extend knowledge in relation to their chosen area of study and to defend their work to academic peers. The project report should demonstrate deep understanding of the theories and concepts, and the application of theoretical knowledge to a real world problem for business and industry.

Institute and Faculty of Actuaries
ACCREDITED

1st in Malaysia & Asia and 6th in the World
to be eligible for exemptions from IFoA professional examination CP1, CP2 and CP3.

Master of **FINANCE**

(R2/0412/7/0002)(10/28)(MQA/FA3456)

Duration:
Full-time - 1+ years
Part-time - 2-3 years

This programme is specifically designed to provide:

- A solid in-depth knowledge in the theory and practice of decision making needed to face the challenges in the financial world of today.
- An understanding of the demanding financial environment and its key areas at a global level.
- Specialised financial knowledge and tools to move from theory to real-world applications needed for a graduate to be on the forefront of the financial world.
- FinTech knowledge and technical skill relevant to Finance.

Career options

- Administrative and Support
- Financial Manager
- Insurance Manager
- Securities Researcher
- Mergers and Acquisitions
- Financial Planner
- Investment Banker
- Securities Trader
- Risk Assurance
- Financial Advisor
- Financial Analyst
- Money / Investment Manager
- Asset Manager
- Chief Financial Officer (CFO)
- Risk Manager

Premier Digital Tech Institution

The Benefits of the Programme

Upon successful completion of this programme, you will be able to:

- Have an in-depth understanding concerning principles of the financial workings and also the application of such understanding in using those financial assets to the world of business and investment.
- Understand and apply advanced concepts of finance and investment and extend the knowledge of the finance discipline into more specialised areas.
- Have the ability to integrate knowledge, handle complexity and formulate judgments with incomplete or information including reflection on the social and ethical responsibilities linked to the application of their knowledge and judgments.
- Communicate clearly and unambiguously the conclusions and the knowledge and rationale underpinning them, to specialist and non-specialist audience. Apply qualitative and quantitative techniques in analysing and evaluating financial and investment problems.
- Use information technology, such as word processing, databases, the web and econometric packages to download and analyse financial and economic data.
- Conduct independent research and solve multidisciplinary and interdisciplinary questions in a professional field on an academic, higher education level.
- Put plans into action with the experience learned from the successful entrepreneurs and a solid understanding of the realities of a business especially in financial or investment related areas.

Who Should Attend

This degree is intended for finance professional looking to widen their skill base, or students who have made a professional commitment to pursue a career in the finance industry and who have studied finance in an undergraduate degree and are interested in equipping with the most comprehensive array of analytical tools and techniques. This Masters of Finance could be a stepping stone to one of the most sought-after careers in the finance sectors broadly defined as corporate finance, security analysis, portfolio management, options and futures, treasury management, the functioning of financial institutions and markets, and financial decision-making.

Accredited by:

CISI
CHARTERED INSTITUTE FOR SECURITIES & INVESTMENT

Modules & Project

This programme comprises 10 coursework modules and a Project.

Pre-Requisite Modules (For Non-Finance Students)
Duration: 1 month (Full-time) / 2 months (Part-time)
- Managerial Finance
- Investment, Markets and Financial Decisions

Modules

- Quantitative Methods for Decision Making
- Corporate Finance
- Financial Statement Analysis
- Financial Markets and Institutions
- Financial Regulation and Regulatory Policy
- Fixed Income and Equity Investment
- Securities, Futures and Options
- International Finance
- Research Methodology
- Investment and Portfolio Management
- Project

Project

You will be expected to conduct effective research in relation to Finance for both academic and industry purposes. Project will provide you an opportunity to study a topic related to Finance in the form of a written report. You are required to develop your chosen research study by conducting literature reviews, engaging with research methodology, developing skills in data collection and analysis. At the end of the study, you will produce and present a report conforming to the conventions of academic writing.

Master of Finance with a specialism in FinTech

FINTECH FOR THE FUTURE

Financial Technology (FinTech) is gaining momentum year-on-year and creating a huge demand for professionals with specific FinTech skills. Traditional accounting and finance industry is getting digitally transformed. To cater to the skill gap in the Financial Services the technology application has become an essential part of the graduate skill.

Traditional financial institutions and FinTech start-ups alike are looking for more candidates who specialise in Artificial Intelligence, Machine Learning, Data Science. According to Bloomberg reporting and data from LinkedIn[1], job listings requiring these skills in the financial services industry increased nearly 60% in the past year. APU Master of Finance (FinTech) programme is designed to cater to the increased demand for finance graduates with FinTech skills.

FUTURISTIC:
[ADVANCEMENTS]

Powered by
FINTECH

"FinTech is massively popular. 96% of global consumers are aware of FinTech-driven money transfer and payment services. 3 out of 4 consumers have used an alternative money transfer and payment service."

- EY Global FinTech Adoption Index

FINTECH FOR THE FUTURE

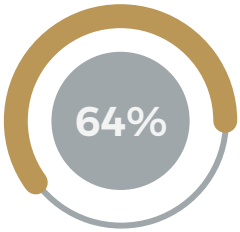

60% of consumers want to transact business with financial institutions with a single platform, such as social media or mobile banking apps.
(Ernst & Young)

"Global FinTech market investments have seen a 28% year-on-year rise from 2018 to 2019."
(Tranglo)

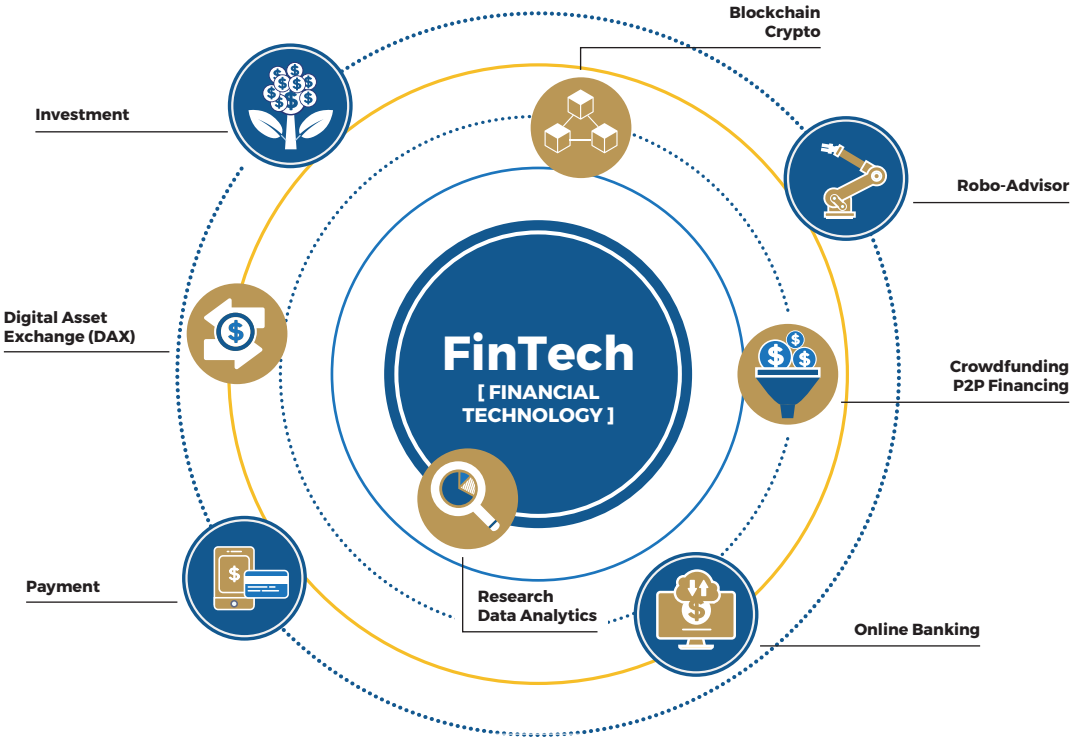

In 2017, 88% of incumbent financial institutions feared that they would lose money to the disruptive innovation of FinTech companies, but 82% plan to partner with FinTech startups in the next 3–5 years. **(PwC)**

In 2019, 64% of consumers worldwide have used one or more FinTech platforms, up from 33% in 2017.
(Ernst & Young)

"Financial institutions are becoming more technology focused. We see it as the evolving intersection of financial services and technology. Looking forward, we expect FinTech disruptors to continue to expand into other areas within financial services."

- Pricewaterhouse Coopers (PwC)

"FinTech is changing businesses and customers rapidly. Those that embrace FinTech will stay at the forefront of their markets; those that don't will lose out on opportunities, customers, and market share."

- Bernard Marr, Forbes

Master of **FINANCE** WITH A SPECIALISM IN FINTECH

DUAL DEGREE

(R2/0412/7/0002)(10/28)(MQA/FA3456)

Duration:

Full-time - 1+ years

Part-time - 2-3 years

This programme is specifically designed to provide:

- Solid in-depth knowledge in the theory and practice of decision making needed to face the challenges in the FinTech industry.
- An understanding of the demanding financial environment and its key areas at a global level.
- Specialised financial knowledge and tools to move from theory to real-world applications needed for a graduate to be at the forefront of the FinTech world.
- FinTech knowledge and technical skill relevant to Finance.

Career options

- Cybersecurity Analyst (Financial Services)
- Data Analyst (Financial Services)
- Finance Manager
- Blockchain Consultant
- Securities Trader
- Financial Planner
- Digital Wealth Manager
- Fund Manager
- Financial Investment Analyst
- Financial Analyst
- Chief Financial Officer (CFO)
- Risk Manager
- Credit Analyst

Powered by

FINTECH

Premier Digital Tech Institution

Note: The specialism will appear only in the academic transcript.

The Benefits of the Programme

Upon successful completion of this programme, you will be able to:

- Understand the financial system and the linkages of financial institutions and markets to corporations, individuals and governments.
- Understand the financial technology (FinTech) ecosystem and the developments that shape the financial industry in the 21st century.
- Acquire the necessary skills to be a successful financial enthusiast championing financial solutions in the 21st century.
- Interpret principles & understandings of financial workings in the world of FinTech.
- Apply qualitative and quantitative techniques in analysing problems in Finance & Technology and solve complex, unstructured finance or investment related problems.
- Perform advanced methods and procedures in solving complex problems by extending the knowledge of the Finance discipline into more specialized areas.
- Employ digital skills such as word processing, the web and econometric packages in analysing financial data while conducting research in a professional field.
- Demonstrate advanced numeracy skills in solving complex problems.
- Apply experience learned and solid understanding of the realities of a business especially in FinTech related areas.

Who Should Attend

This degree is intended for finance professionals looking to widen their skill base or students who have made a professional commitment to pursue a career in the financial service industry with a focus on FinTech skills and who have studied finance in an undergraduate degree and interested in equipping with the most comprehensive array of analytical tools and techniques. This Master of Finance (FinTech) could be a stepping stone to one of the most sought-after careers in the finance sectors broadly defined as corporate finance, security analysis, portfolio management, financial technology, and the functioning of financial institutions and markets.

Master of **ACCOUNTING**

(R2/0411/7/0006)(04/29)(MQA/FA3458)

Duration:
Full-time - 1+ years

This programme is specifically designed to provide:

- Exposure towards both financial and managerial aspects of accounting.
- Knowledge of current and latest practices and principles of accounting.
- In-depth knowledge of accounting concepts and standard procedures.
- Exposures towards professionalism and ethical standards needed to execute accountabilities and responsibilities in evaluation and decision making.
- FinTech knowledge and technical skill relevant to Accounting and Finance.

Career options

- Accounts Manager
- Inventory Manager
- Credit Controller
- Audit Manager
- Financial Analyst
- Tax Consultant
- Payroll Manager
- Compliance Manager
- Budget Analyst
- Senior Risk Analyst
- Audit Consultant
- Chief Financial Officer (CFO)

Premier Digital Tech Institution

The Benefits of the Programme

Upon successful completion of this programme, you will be able to:

- Demonstrate a coherent and advanced understanding of the concepts, principles of accounting, its applications and financial workings, and also the application of such understanding in using those financial assets to the real world of business and investment.
- Describe and comment on advanced scholarship in accounting and finance and critically evaluate arguments and assumptions to make judgments.
- Demonstrate the ability to recognise and appropriately respond to ethical issues in the practice of accounting by incorporating appropriate professional codes of conduct and social responsibility.
- Use oral, written and electronic communication to elicit information, to explain, debate and present complex arguments, knowledge and rationale to different audiences and circumstances.
- Gather, interpret, evaluate, analyse and apply relevant professional standards to complex accounting-related issues, and come to well-reasoned conclusions.
- Demonstrate a commitment to life-long learning and professional development by reading and critically appraise management theory.

Who Should Attend

This programme is specially designed for enhancing the current group of accounting graduates or practitioners who may need to further advance, improve their fundamental understanding of the accounting profession and the market needs from the academia perspective. It is a process of preparation as well as upgrading their skills.

Modules & Project

This programme comprises 13 coursework modules and a Project.

Pre-Requisite Modules (For Non-Accounting Students)
Duration: 1 month (Full-time)
- Cost Accounting Fundamental
- Financial Accounting Fundamentals 1
- Financial Accounting Fundamentals 2

Modules
- Quantitative Methods for Decision Making
- Managerial Finance
- Professional Ethics and Corporate Governance
- Professional Auditing: Theories and Practices
- Advanced Corporate Reporting and Analysis
- Managerial Economics
- Business Law
- Taxation
- Forensic Accounting Engagement
- Research Methodology
- Global Strategic Management
- Accounting Information Systems
- Management Accounting for Decision Making
- Project

Project

You will be expected to engage in comprehensive research through a critical review of published material relevant to Accounting. Thorough review is carried out on theoretical and empirical literature from which a conceptual or theoretical framework is derived. Sources of literature will range from academic papers, business case history and consultancy reports. Existing theories and research findings will be utilised to create solutions or opportunities to address challenges in today's international business climate. Identification of such opportunities or challenges will be important factors in modern business strategies and planning. Business case history will be utilised to research and analyse either the strategies of an organisation or the application of specific concepts, theories or techniques as well as analyse the effectiveness and outcomes. The consultancy reports will be utilised to examine contemporary problems faced by one or more organisations and to recommend strategies and actions to be taken by the organisation(s). Case study would be the core focal point of content delivery for this course.

Master of **ACCOUNTING IN FORENSIC ANALYSIS**

DUAL DEGREE

(R2/0411/7/0007)(04/29)(MQA/FA3459)

Duration:
Full-time - 1+ years

This programme is specifically designed to provide:

- A progressive, challenging and stimulating framework of study that will equip students with knowledge and skills required in this field.
- Legal and ethical knowledge for forensic accountants to meet the demands of the current financial market.
- FinTech knowledge and technical skill relevant to Accounting and Finance.

Career options

- Forensic Accountant
- External Auditor
- Risk Department Manager
- Internal Auditor
- Chief Financial Officer (CFO)
- Forensic Investigator
- Investigative Accountant
- Audit Consultant
- Forensic Advisor
- Forensic Analyst
- Accounts Manager
- Risk Assurance Associate
- Fraud Investigator

Premier Digital Tech Institution

The Benefits of the Programme

Upon successful completion of this programme, you will be able to:

- Demonstrate an advanced understanding of the concepts, principles of forensic accounting theory, and understand the legal framework of forensic accounting services and the roles and responsibilities of the forensic accountant.
- Recognise and appropriately respond to ethical issues in the practice of accounting by incorporating appropriate professional codes of conduct and social responsibility.
- Conduct successful investigations and communicate effectively in writing and orally both in and out of the courtroom with respect to a variety of criminal and civil financial matters.
- Develop a mindset of professional scepticism, using critical thinking and creative approaches to complex problem solving.
- Gather and analyse quantitative and non-quantitative evidence, plan and conduct a research project in a professional and ethical manner which requires familiarity with a range of data, research sources and appropriate methodologies.
- Create, evaluate and assess a range of options together with developing the capacity to apply ideas and knowledge to a range of situations.

Who Should Attend

This progamme is ideal for any fresh graduate interested in pursuing a career in the dynamic and growing field of forensic accounting and fraud examination as well as those accountants and auditors who wish to pursue or enhance their career as forensic accountants. This programme integrates the accounting, auditing and investigative skills used to yield analysis and results suitable for use by the courts as the basis for resolution.

Modules & Project

This programme comprises 13 coursework modules and a Project.

Pre-Requisite Modules (For Non-Accounting Students)
Duration: 1 month (Full-time)

- Cost Accounting Fundamental
- Financial Accounting Fundamentals 1
- Financial Accounting Fundamentals 2

Modules

- Quantitative Methods for Decision Making
- Managerial Finance
- Forensic Accounting and Fraud Examination
- Professional Auditing: Theories and Practices
- Advanced Corporate Reporting and Analysis
- Managerial Economics
- Forensic Analytics in Financial Statements
- Criminology and Legal Framework
- Cybercrime and Investigation
- Research Methodology
- Global Strategic Management
- Accounting Information Systems
- Management Accounting for Decision Making
- Project

Project

You will be expected to engage in comprehensive research through a critical review of published material relevant to Accounting in Forensic Analysis. Thorough review is carried out on theoretical and empirical literature from which a conceptual or theoretical framework is derived. Sources of literature will range from academic papers, business case history and consultancy reports. Existing theories and research findings will be utilised to create solutions or opportunities to address challenges in today's international business climate. Identification of such opportunities or challenges will be important factors in modern business strategies and planning. Master of Arts in Design Innovation Management

The Masters of Arts in Design Innovation Management programme will enhance graduates managerial skills and develop interdisciplinary knowledge through both theoretical and practical modules on a range of topics relevant to contemporary design management issues.

The interdisciplinary blend of design, innovation and management in this programme will enable graduates to develop critical approaches and practices that enhance their effectiveness as a practitioner, to enable graduates to pursue a broad range of design management careers in the private and public sectors relevant to the world of today.

Master of Arts in **DESIGN INNOVATION MANAGEMENT**

DUAL DEGREE

(R/0288/7/0001)(05/31)(MQA/FA14558)

Duration:

Full-time - 1+ years

This programme is specifically designed to:

- Extend design innovation management programme to different organisations that consider design to be a strategic competitive force.
- Meet the growing demand for advanced skills in design management and leadership in the various services and business.
- Prepare graduates to meet the growing needs for management of advanced design technology and implementation of new management approaches.

Career options

- Project Manager
- Design Producer
- Brand Manager/ Strategist
- Marketing Manager
- Product Manager
- Account Manager
- Client Manager
- Chief Design Officer
- Design Researcher
- Design Strategist
- Service Designer/ Design Experience Strategist
- Venture Architect

Premier Digital Tech Institution

The Benefits of the Programme

- Innovation and management from a creative perspective, within a world-leading art and design institution with strong link to the creative industries.
- Apply Design Thinking to real-world challenges, design collaboratively, engage critically and creatively with others and learn from shared experiences.
- An interdisciplinary programme informed by theories drawn from a range of design, business and humanities areas and delivered through projects and collaborations.
- Gain insight into creative briefs, target audiences and markets, through Design Management and Innovation.
- Benefit from diverse potential employment routes including setting up your own business, in-house and external design leadership roles, cultural positions and agency management jobs.

Who Should Attend

This programme is geared towards graduates who have graduated from design backgrounds who wish to master managerial skills that are relevant to their previous experience. This programme also appeals to non-design field managers and executives who require design management skills as part of their managerial responsibility.

A member of World Design Organisation

WDO WORLD DESIGN ORGANIZATION

Modules & Project

This programme comprises 9 coursework modules and a Creative Futures Project.

Pre-Requisite Modules (For Non-Design Students)
Duration: 1 month (Full-Time)

- Design Literacy
- Visualisation & Information Design
- Understanding Customer
- Managing People

Core Modules

- Design and Creative Industries
- Business Planning for Creative Entrepreneur
- Research Methodology
- Design Thinking
- Integrated Brand Management
- Future Media Innovation
- Service Design
- Project Feasibility Study
- Creative Futures Project

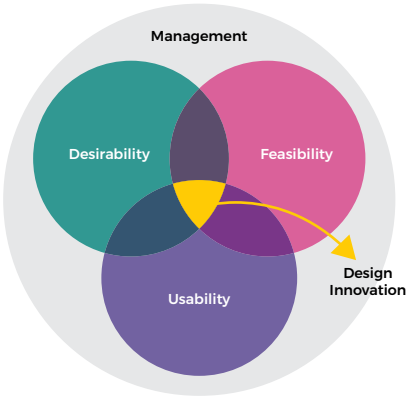

Elective Modules (Choose 1)*

- Intellectual Property
- Creative Sustainability
- Technology Management
- Design for Retail
- Managing Business Web Presence

* Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules - however such changes may prolong the study duration.

Creative Futures Project

For the final project module named Creative Futures Project, you will need to complete an industry-based major projects along with evidence and output related to the Design Innovation Management field. There will be a final exhibition and presentation towards the end of the course.

Framework adopted from Design Innovation Framework Diagram

This programme will enhance graduates' managerial skills and develop interdisciplinary knowledge through both theoretical and practical modules on a range of topics relevant to contemporary design management issues.

The interdisciplinary blend of design, innovation and management in this programme will enable graduates to develop critical approaches and practices that enhance their effectiveness as a practitioner. This enable graduates to pursue a broad range of design management careers in the private and public sectors relevant to the world today.

Master of Education in Learning Design and Technology

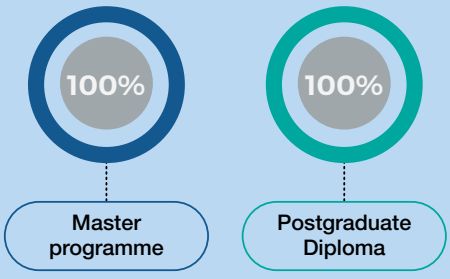

Unlock the Future of Education with Innovative Learning Design

In an age where education and technology converge, the Master of Education in Learning Design and Technology at APU empowers professionals from all backgrounds to lead the way. Dive into AI-driven environments, master digital learning design, and innovate with advanced assessment techniques. Whether you're an educator or from another field, this programme equips you with the skills to create impactful learning experiences and drive educational innovation. Join us to shape the future of learning and make a lasting difference in the world.

Programme Alignment with MEE Expert Requirements

Your Path to Microsoft Elevate for Educators (MEE) Expert Skills

Our curriculum equips you with cutting-edge digital tools and innovative teaching approaches, positioning you for this prestigious recognition and leadership in educational technology.

(% indicate coverage levels of required modules)

Benefits of Becoming a MEE Expert:

- Join a global community of educational technology leaders.
- Access exclusive Microsoft resources and development opportunities.
- Gain professional recognition as an educational innovation leader.
- Collaborate with like-minded professionals worldwide.

** Self-nomination is required and renewable on yearly basis.*

Master of Education in LEARNING DESIGN AND TECHNOLOGY

(N/0114/7/0026)(8/29)(MQA/PA17659)

Duration:

Full-time - 1+ years

This programme is specifically designed to:

- Innovative curriculum that combines the latest in learning sciences, AI - driven environments and cutting edge digital technologies.
- Professional development in applying practical skills taught by industry experts to design customized educational experiences.
- Supportive learning environments with state-of -the-art facilities and a variety of learner centric teaching methods to foster independent learning through research informed teaching.

Career options

- Learning Design Specialist
- E-Learning Trainer
- Instructional Designer
- Digital Learning Designer
- Adaptive Learning Designer
- Educational Technology Executive
- Curriculum Developer
- Educational Technology Manager
- Corporate Training Manager
- Education Technology Entrepreneur
- Data Scientist in Education
- Education Planning Advisor
- Education Policy Advisor

Premier Digital Tech Institution

The Benefits of the Programme

Our master's programme offers a transformative learning experience, equipping you with the skills and knowledge to excel in the ever-evolving field of education:

- Comprehensive Mastery: Gain a deep understanding of learning design and technology, integrating essential topics from learning sciences to AI-driven environments.
- Practical Skills: Develop hands-on experience with advanced digital technologies to create personalised learning environments.
- Leadership in Innovation: Cultivate your capacity for visionary leadership, ethical practices, and data-informed decision-making.

This programme imparts advanced knowledge and cultivates practical skills necessary for tomorrow's educational leaders.

Who Should Attend

This programme is for those who want to be at the forefront of educational innovation, shaping the future of learning in various settings, from traditional classrooms to corporate training environments and online platforms.

This programme is ideal for individuals who:

- Work as teachers, trainers, educational administrators, or instructional designers.
- Are passionate about integrating technology into educational settings and improving learning outcomes.
- Want to lead technology integration initiatives in schools, universities, or corporate training departments.
- Are committed to lifelong learning and staying current with the latest trends in educational technology.
- Have a keen interest in addressing educational challenges through technological solutions.

Modules & Research Project

This programme comprises 9 coursework modules and a Research Project.

Pre-Requisite Modules (For Non-Education Students)
Duration: 1 month (Full-Time)

- Pedagogy for Teaching in a Digital Age
- Principles of Curriculum Design

Core Modules

- Learning Sciences
- Digital Learning Environments
- Innovative Assessments
- Learning Design
- Psychology for Learning
- AI Driven Learning Resources
- Research Methodology
- Learning Analytics for Decision Making
- Research Project

Elective Modules (Choose 1)*

- Cybersecurity in Educational Technology
- Video Games and Education
- Managing Creativity and Innovation

* Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules - however such changes may prolong the study duration.

Research Project

You will be expected to demonstrate the ability to plan and undertake a research project, conduct a thorough investigation of your chosen area of study, extend knowledge related to this area, and defend your work to academic peers. The project report should demonstrate a deep understanding of relevant theories and concepts, as well as the application of theoretical knowledge to real-world problems in business and industry.

Aligned with the Microsoft Elevate for Educators Expert Pathway

Selected modules support the development of digital teaching competencies relevant to the MEE Expert pathway.

Separate application and eligibility requirements apply.

Master of Philosophy in **ENGINEERING** (R2/0710/7/0005)(04/32)(MQA/FA6112)
Master of Philosophy in **MANAGEMENT** (R/0414/7/0091)(05/29)(MQA/FA9018)
Master of Science in **COMPUTING** (R/0614/7/0006)(06/29)(MQA/FA9019)
Master of Philosophy in **IMMERSIVE TECHNOLOGIES AND VIDEO GAME STUDIES** (N/0211/7/0010)(05/32)(MQA/PA18157)

Duration:

Full-time - 2 years

Part-time - 3-4 years

This programme is specifically designed to provide:

- Knowledge to enhance technical capabilities within the subject area.
- Understanding of how to innovate, generate and manage the creation of new ideas.
- In-depth knowledge of a certain domain of knowledge, that is related to management and computing.
- Advanced research experience and skills that enable students to pursue a PhD programme.

Career options

Master of Philosophy in Engineering

- Academic / Lecturer
- Quality Assurance Specialist
- Researcher
- Product Design and Developer
- R&D Engineer
- Project Engineer
- Engineering Consultant

Master of Philosophy in Management

- Data Analyst
- Academic / Lecturer
- Researcher

Master of Science in Computing

- Computer and Information Systems Manager
- IT Director
- IT Research and Development Leader
- Computing Scientist
- University Lecturer
- IT Project Manager

Master of Philosophy in Immersive Technologies and Video Game Studies

- Interactive Experience Designer
- Advanced User Experience Strategist
- Immersive Digital Innovation Specialist
- Immersive Technology Scholar - Practitioner

MD™ Premier Digital Tech Institution

Conversion to PhD

Students of the Research Degree programme may convert to a PhD candidate if they satisfy all the criteria below:

(a) Display excellent progress in their research.

(b) Able to demonstrate the potential of their project to be expended to PhD level.

(c) Pass a rigorous assessment.

Successful conversion means that the student will no longer be a Research Degree candidate but will instead become a PhD candidate with their candidature start date backdated to their original Research Degree registration date. Hence, it allows the student to gain a PhD award within a shorter timeframe, without the need to complete a Masters programme.

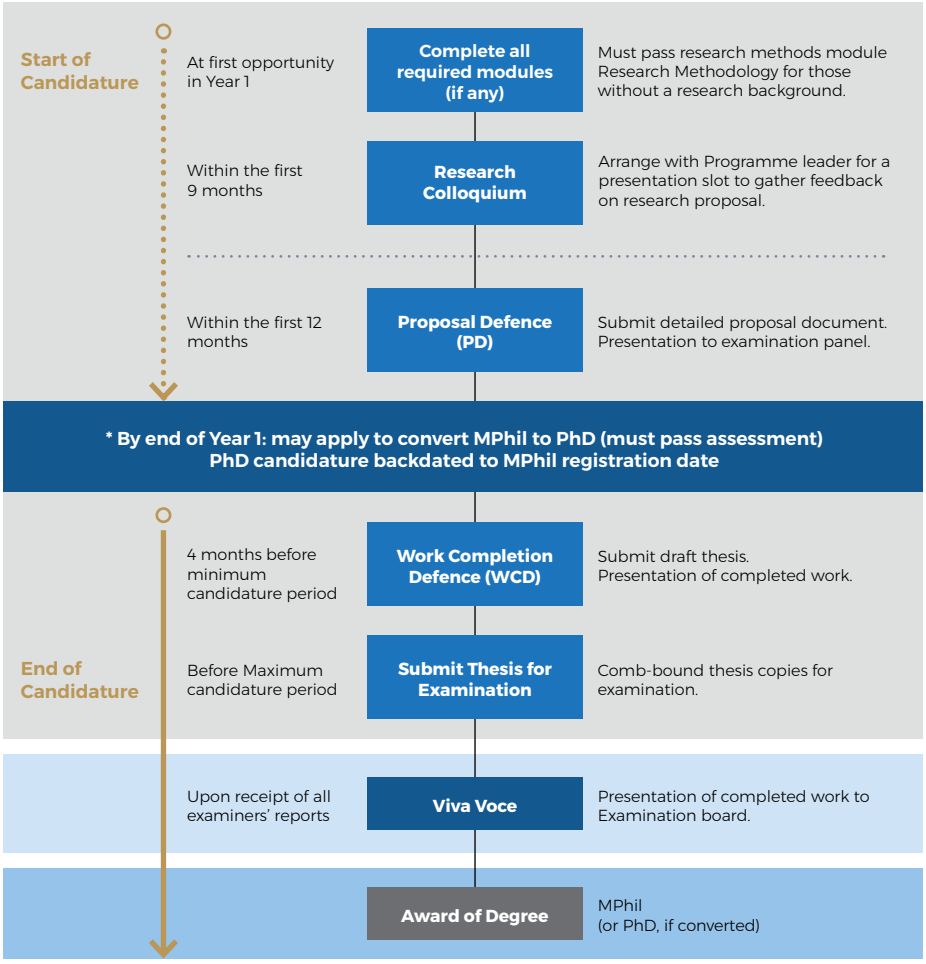

Modules & Assessments

This programme is conducted by research and is assessed via oral presentations and reports at various junctures, including a Proposal Defence, regular half-yearly progress monitoring at research colloquiums, Work Completion Defence, Thesis Examination and Viva Voce. Students would need to take one taught module on Research Methodology to gain the pre-requisite knowledge to effectively carry out their research. Regular discussions with the supervisors would be expected to ensure the direction of research as well as the quality and significance of the findings.

Programme Structure / Process Flow

Application Process

Ideally, student works with potential supervisors to develop proposal.

100% Online

Master Degree Open & Distance Learning

Open & Distance Learning (ODL)

- The ODL (Open & Distance Learning) programmes are designed to address the theoretical, practical and scientific skills and contribute towards new and meaningful knowledge in their field of expertise.
- ODL allows students to learn anytime, anywhere at their own pace - this power of freedom has ignited more interest & excitement in learning.
- All the Master (ODL) programmes are available for part-time study mode. The minimum duration of study is 2.5 years.
- Students are to register the modules on a modular basis. Each module will be offered over a two-month duration.

- **Master of Science in Artificial Intelligence (ODL)**
- **Master of Science in Cyber Security (ODL)**
- **Master of Science in Data Science and Business Analytics (ODL)**
- **Master of Business Administration (ODL)**
- **Master of Business Administration with a specialism in:**
  - *Digital Leadership (ODL)*
  - *Artificial Intelligence (MBAi) (ODL)*
  - *Supply Chain Management (ODL)*
  - *Sustainability Leadership (ODL)*
  - *Business Analytics (ODL)*
  - *Oil and Gas Management (ODL)*
  - *Hospitality and Tourism (ODL)*
- **Master of Arts in Design Innovation Management (ODL)**
- **Master of Applied Psychology in Cyberpsychology (ODL)**
- **Master of Education in Learning Design and Technology (ODL)**
- **Postgraduate Diploma of Education in Learning Design and Technology (ODL)**
- **Postgraduate Certificate of Education in Learning Design and Technology (ODL)**

100% Online

Master of Science in ARTIFICIAL INTELLIGENCE (ODL)

DUAL DEGREE

Open & Distance Learning (ODL)

(N-DL/0613/7/0004)(12/27)(MQA/FA16033)

Duration:
ODL - 2.5-3 years

This programme is specifically designed to provide:

- Advanced skills and techniques in artificial intelligence
- Research opportunities to solve meaningful industrial problems with artificial intelligence techniques
- Advanced research opportunities in artificial intelligence in preparation for doctoral studies.

Career options

- Software Engineer
- Data Scientist
- AI Researcher
- Intelligence Specialist
- Consultant
- AI Data Analyst
- Machine Learning Engineer
- Robotics R&D Engineer
- Machine Vision Engineer
- Artificial Intelligence Analyst
- Deep Learning Scientist

Premier Digital Tech Institution

The Benefits of the Programme

Upon successful completion of this programme, you will be able to :

- Gain hands-on experience to implement Artificial Intelligence (AI) to solve problems
- Grasp knowledge on a wide range of subject matters ranging from Machine Learning, Robotics to Natural Language Processing.
- Effectively undertake and manage large scale and complex Artificial Intelligence (AI) projects.
- Engage in the design and implementation of Artificial Intelligence (AI) systems of high quality and reliability.
- Appreciate problems and suggest solutions associated with the development of Artificial Intelligence (AI) systems.
- Appreciate how an efficient Artificial Intelligence (AI) technology based infrastructure is a key factor in enabling a business to gain a competitive edge.
- Draw upon the body of knowledge and be able to overcome human limits to solve new problems using Artificial Intelligence (AI).

Who Should Attend

This programme is geared towards practicing IT/Computing professionals within industry who seek further formal qualifications in Artificial Intelligence. In addition, professionals and managers who wish to enhance themselves with Artificial Intelligence knowledge and skills to postgraduate level will find this programme attractive. Fresh undergraduate students from Artificial Intelligence / Software Engineering / Data Science background will also find this programme worthwhile as a path to further enhance their academic qualifications.

Modules & Project

This programme comprises 10 coursework modules and a Project.

Pre-Requisite Modules (For Non-Computing Students)
Duration: 4 months (ODL)

- Programming in Python
- Database Fundamentals
- Fundamentals in Artificial Intelligence
- Statistics

Core Modules

- Artificial Intelligence
- Image Processing and Computer Vision
- Computational Intelligence Optimization
- Applied Machine Learning
- Deep Learning
- Natural Language Processing
- Research Methodology in Computing and Engineering
- Project Paper

Elective Module 1 (Choose 1)*

- Business Intelligence Systems **OR** Multivariate Methods for Data Analysis

Elective Module 2 (Choose 1)*

- Applied Robotics **OR** Explainable Artificial Intelligence

Elective Module 3 (Choose 1)*

- Intelligent Agents and Multi-Agent Systems OR Generative Artificial Intelligence

* Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules – however such changes may prolong the study duration.

Project

You will be expected to conduct effective research in relation to Artificial Intelligence for both academic and industry purposes. Either route will require you to plan and conduct effective academic research, and produce one academic paper, consultancy report or academic paper in relation to an aspect of Artificial Intelligence.

100% Online

(N-DL/0613/7/0033)(07/29)(MQA/PA17433)

Duration:

ODL - 2.5-3 years

This programme is specifically designed to provide:

- Opportunity for professional development at an advanced level within the area of Cyber Security.
- Ability to further develop specialisation gained in taught modules through an extensive research-based and/or technical based dissertation, to prepare a subject matter expert in the field.
- APU is also poised to become a frontrunner in cyber security research through the establishment of the Forensics and Cyber Security (FSEC) Research Centre, through which research activities will be undertaken to challenge boundaries in the application of cyber security.

Career options

- Security Architect
- Cyber Security Analyst / Consultant
- Information Security Analyst
- Cyber Security Incident Response Consultant
- Digital Forensic Investigator
- Cyber Security Engineer
- Information Security Engineer
- Cyber Security Manager
- Information Security Manager

Certification by:

Premier Digital Tech Institution

The Benefits of the Programme

- The curriculum covers a wide range of industry relevant subject areas in Security Operations Centre (SOC) and Incident Response, Security Auditing and Assessment, Advanced Ethical Hacking, E-Investigation, Data Analytics in Cyber Security etc.
- External reviews conducted by Cyber Security Malaysia (CSM), KPMG and F-Secure during the development of the programme curriculum.
- Programme Support by an Industry Advisory Panel involving cyber security experts from Cyber Intelligence, Cyber Test Systems, Akati Consulting Group and Cyber Security Malaysia (CSM).
- A fully-functional Security Operations Centre (SOC) that allows students to have handson cybersecurity operations platform to monitor live data which allows them to perform real-time cyber security monitoring to fortify network defense with global threat intelligence and launching faster response on cyber security incidents.
- A full-fledged Cyber Threats Simulation and Response Centre – Cyber Range is also included within the Cyber Security Talent Zone in APU. Cyber Range incorporates latest technologies and a military grade cyber-defence system, enabling students to understand and formulate defence strategies, and practice the entire chain of cyber defence, while preparing them to deal with real cyber threat attack when it happens.
- A technical project related to Cyber Security as dissertation in the final semester.
- Research opportunities for students via APU's Forensic and Cyber Security Research Centre - FSEC.

Who Should Attend

This programme is geared towards practicing IT/Computing professionals within industry who seek further formal qualifications in Cyber Security. In addition, professionals and managers who wish to enhance themselves with Cyber Security knowledge and skills to postgraduate level will find this programme attractive. Fresh undergraduate students from Cyber Security / Digital Forensics background will also find this programme worthwhile as a path to further enhance their academic qualifications..

Modules & Project

This programme comprises 10 coursework modules and a Project.

Pre-Requisite Modules (For Non-Computing Students)
Duration: 4 months (ODL)
- Programming in Python
- Database Fundamentals
- Digital Forensics and Cyber Security Tools

Core Modules
- Information Security Design
- Applied Machine Learning in Cyber Security
- Cyber Security & Threats
- Security Operations Center & Incident Response
- Advanced Ethical Hacking
- Advanced Digital Forensics
- Research Methodology in Computing & Engineering
- Project Paper

Elective Modules (Choose 3)*
- Network Design & Performance
- Information Security Architectures
- Security Audit and Assessment
- E-Investigation
- Artificial Intelligence

*Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules – however such changes may prolong the study duration.

Project

As part of this course, you are expected to complete an extensive project paper in relation to Cyber Security for both academic and industry purposes. This project paper will be supervised by a member of academic staff as the main supervisor. It may involve working with an external organisation (probably directly relevant to your work or organisation or any of our industry partners). You are given considerable flexibility in choosing any Cyber Security related topics to base your project paper. As for the deliverables, you are required to come up with a prototype / simulation / framework etc. (the list is just an example and not limited to only these) and to produce one project paper and a publishable conference / journal paper consists of summary of the work.

DUAL DEGREE

Master of Science in DATA SCIENCE AND BUSINESS ANALYTICS (ODL)

Open & Distance Learning (ODL)

(R-DL/0613/7/0026)(03/31)(MQA/FA14220)

Duration:
ODL - 2.5-3 years

This programme is specifically designed to provide:

- Knowledge and applied skills in data science, big data analytics and business intelligence.
- Overall understanding of the impact of data science upon modern processes and business.
- Exposure towards data science tools and techniques, as well as methods of data collection and utilisation, to tun data into useful information via various processes.

Career options

- Data Engineers
- Data Analyst
- Business Analyst
- Data Scientist
- Chief Technology Officer (CTO)
- Data Analytics Manager
- Business Analyst Manager
- Data Innovation Manager
- Machine Learning Scientist
- Business Process Engineer
- Data Wrangler / Munger / Miner
- Business Intelligence Manager
- Analytics & Reporting Manager
- Decision Analytics Manager

MD™ Premier Digital Tech Institution

The Benefits of the Programme

- In addition to the degree award, a Joint Professional Certification will be offered by SAS Institute, USA.
- 30% of the curriculum will allow for mini projects assessed as in-course work allowing for practical skills development in Data Analytics.
- The curriculum covers a wide range of subject matter from Analytical Technologies, Exposure to tools such as R & SAS Modelers, Data Visualisation, Customer/User Behavioural Studies, Forecasting Methods and to Presenting the Business Intelligence reports.
- External Programme Annual Reviews by International University Partners.
- Programme Support by an Industry Advisory Panel involving data analytical experts from Petronas ICT, RedTone, SharePoint, CyberSecurity Malaysia, Maxis, IBM, Microsoft, Fusionex and Axiata.
- Research opportunities via APU's Centre of Analytics - APCA.

Who Should Attend

This programme is designed to provide students with knowledge and applied skills in data science, big data analytics and business intelligence. It aims to develop analytical and investigative knowledge and skills using data science tools and techniques, and to enhance data science knowledge and critical interpretation skills. Students will understand the impact of data science upon modern processes and businesses, be able to identify, and implement specific tools, practices, features and techniques to enhance the analysis of data.

POWER of Analytics and Data Driven Marketing

Modules & Project

This programme comprises 11 coursework modules and a Capstone Project (2 parts).

Pre-Requisite Modules (For Non-Computing Students)
Duration: 4 months (ODL)

- Programming in Python
- Database Fundamentals
- Statistics

Core Modules

- Big Data Analytics & Technologies
- Data Management
- Natural Language Processing
- Research Methodology for Capstone Project
- Applied Machine Learning
- Data Analytical Programming
- Multivariate Methods for Data Analysis
- Capstone Project 1
- Capstone Project 2
- Advanced Business Analytics and Visualisation

**Specialisation Modules*
(Choose 1 Pathway only)**

Pathway 1 (Business Intelligence):

- Business Intelligence Systems
- Time Series Forecasting
- Behavioural Science, Social Media and Marketing Analytics

OR Multilevel Data Analysis
OR Operational Research and Optimization

Pathway 2 (Data Engineering):

- Cloud Infrastructure and Services
- DataOps and Production Machine Learning
- Deep Learning

OR Intelligent Agents and Multi-Agent Systems
OR Data Protection and Management

* Specialisation modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules - however such changes may prolong the study duration.

sas

SAS certification is awarded to students who complete:
• Data Management
• Data Analytical Programming
• Advanced Business Analytics and Visualisation

- Advanced knowledge and skills to effectively lead and manage sustainability initiatives within organizations.
- Leadership capabilities focused on driving sustainability agendas and integrating sustainable practices into business strategies.
- Problem-solving skills to address complex sustainability issues and create innovative solutions that promote long-term environmental and social responsibility.
- Principles of ethical leadership and corporate social responsibility to guide decision-making and strategic planning.

Career options

- Sustainability Manager / Consultant
- Corporate Social Responsibility Manager
- Environmental Consultant
- Sustainability Analyst
- Sustainable Product Development Manager
- Green Finance Specialist
- Chief Sustainability Officer (CSO)

Premier Digital Tech Institution

Note: The specialism will appear only in the academic transcript.

The Benefits of the Programme

No Exams
100% Courseworks/ Assignments

- Gain specialised skills in sustainability leadership, enhancing marketability and career prospects in various industries.
- Derive actionable insights and provide strategic recommendations specifically related to sustainability initiatives and practices.
- Prepare for leadership positions, focusing on driving and integrating sustainability strategies within organizations.
- Improve processes, operations, and strategies to promote sustainability and long-term environmental and social responsibility.
- Exhibit innovative problem-solving skills tailored to addressing complex sustainability issues and driving impactful solutions.
- Demonstrate strong intellectual and analytical capabilities in strategic management with a focus on sustainability leadership and corporate responsibility.

Who Should Attend

This programme is designed for individuals who eager to lead and implement sustainability initiatives effectively within organisations and drive impactful change in today's evolving business environment. It is particularly suited for managers and professionals aiming to integrate sustainability into their company's strategic framework and operations. Additionally, it benefits policy makers and advisors involved in shaping or influencing sustainability policies and regulations at organisational, local, or national levels. Additionally, it is also suitable for business owners or entrepreneurs interested in establishing or managing enterprises with a strong commitment to sustainability and responsible practices.

Modules & Project

This programme comprises 13 coursework modules and a Project.

Pre-Requisite Modules (For Non-Business Students)
Duration: 2 months (ODL)
- Managing People
- Managerial Finance
- Understanding Customers
- Business Environment & Strategic Planning

Core Modules
- Organisational Behaviour
- Accounting and Finance for Managers
- Managerial Economics
- Technology Management
- Global Strategic Management
- Digital Marketing Tools and Trends
- Statistical Decision Making
- Entrepreneurship
- Human Resource Management
- Research Methodology
- Project

Specialisation Modules
- Leadership and Sustainability
- Business Ethics & Corporate Responsibility
- FinTech, Green Finance, and Investment

Project

You will be expected to conduct effective research in relation to your area of specialisation (Sustainability Leadership) for both academic and industry purposes. Either route will require you to plan and conduct an effective individual research and analysis, leading to a significant academic paper, consultancy report or case history in relation to an aspect of business.

POWER of Analytics and Data Driven Marketing

DUAL DEGREE

Master of Arts in DESIGN INNOVATION MANAGEMENT (ODL)

Open & Distance Learning (ODL)

(N-DL/0288/7/0002)(03/30)(MQA/PA17935)

Duration:

ODL - 2.5-3 years

This programme is specifically designed to provide:

- Extend design innovation management programme to different organisations that consider design to be a strategic competitive force.
- Meet the growing demand for advanced skills in design management and leadership in the various services and business.
- Prepare graduates to meet the growing needs for management of advanced design technology and implementation of new management approaches.

Career options

- Project Manager
- Design Producer
- Account/Client Manager
- Chief Design Officer
- Design Researcher
- Design Strategist
- Service Designer /Design Experience Strategist
- Marketing Manager
- Product Manager
- Brand Manager / Strategist
- Venture Architect
- Sustainable Designer / Sustainable Manager
- Innovation Manager

Premier Digital Tech Institution

The Benefits of the Programme

- The MA in Design Innovation Management programme will enhance graduates managerial skills and develop interdisciplinary knowledge through both theoretical and practical modules on a range of topics relevant to contemporary design management issues.
- The interdisciplinary blend of design, innovation and management in this programme will enable graduates to develop critical approaches and practices that enhance their effectiveness as a practitioner, to enable graduates to pursue a broad range of design management careers in the private and public sectors relevant to the world of today.
- Graduates will also learn the value of collaborative behaviour and teamwork through modules such as the collaborative project, and will gain an insight into the inner workings and pressures facing real world contexts.

Who Should Attend

This programme will appeal to graduates who wish to:

- Gain valuable insights into how design innovation management is expanding in complex and changing contemporary contexts, while applying the skills and knowledge through a diversity of projects.
- Develop innovative and critical thinkers through the key areas of creative practice, business/management, and cultural research that come together in this curriculum.
- Place an emphasis on strategic and socially engaged design and real-world projects with agencies, research and strategy organisations and not-for-profit organisations.

A member of World Design Organisation

WDO WORLD DESIGN ORGANIZATION

Modules & Project

The programme comprises of 8 coursework modules, research methodology and a project named Creative Futures Project.

Pre-Requisite Modules (For Non-Design Students)
Duration: 2 months (ODL)
- Design Literacy
- Visualisation & Information Design
- Understanding Customer
- Managing People

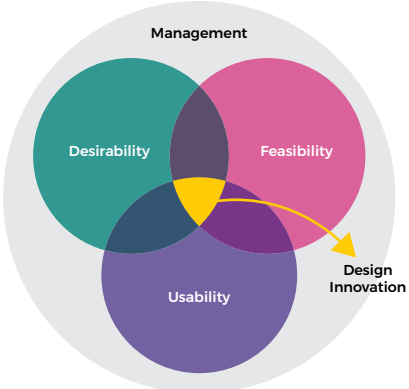

Core Modules
- Design and Creative Industries
- Business Planning for Creative Entrepreneur
- Research Methodology
- Design Thinking
- Integrated Brand Management
- Future Media Innovation
- Service Design
- Project Feasibility Study

Elective Modules (Choose 1)*
- Intellectual Property
- Creative Sustainability
- Managing Design for Web

* Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules – however such changes may prolong the study duration.

Creative Futures Project

Student will need to complete an industry-based major projects along with evidence and output related to Design Innovation Management field. There will be a final exhibition and presentation towards the end of the course.

Framework adopted from Design Innovation Framework Diagram

This programme will enhance graduates' managerial skills and develop interdisciplinary knowledge through both theoretical and practical modules on a range of topics relevant to contemporary design management issues.

The interdisciplinary blend of design, innovation and management in this programme will enable graduates to develop critical approaches and practices that enhance their effectiveness as a practitioner. This enable graduates to pursue a broad range of design management careers in the private and public sectors relevant to the world today.

Master of Applied Psychology in CYBERPSYCHOLOGY (ODL)

DUAL DEGREE

Open & Distance Learning (ODL)

(N-DL/0313/7/0025)(06/30)(MQA/PA18241)

Duration:
ODL - 2+ years

This programme is specifically designed to provide:

- **Digital Mind & Behavior:** Build a deep understanding of how digital spaces—like social media, AI, and virtual reality—shape human thoughts, identity, and actions.
- **Cybersecurity & Online Risks:** Gain practical insights into real-world digital issues, including online deception, internet safety, cyber forensics, and digital well-being.
- **Data & Research Skills:** Master advanced tools in data analysis, psychology testing, and both quantitative and qualitative research built for digital environments.
- **Ethics & Hands-On Practice:** Learn to navigate ethical challenges like algorithmic bias and data privacy, then apply these skills in a real-world internship and research project.

Career options

- User Experience (UX) Researcher
- Behavioral Product Designer
- Digital Well-being Consultant
- Tech Sector People & Culture Strategist
- Cyber-Workforce Wellness Manager
- Policy Advisor (Digital Risks & Mental Health)
- Cyberpsychology Research Scientist
- Digital Mental Health Programme Coordinator
- Media Literacy Educator
- Telehealth Experience Designer

MD™ Premier Digital Tech Institution

The Benefits of the Programme

- First-Mover Advantage: Join one of the few specialised postgraduate programmes in Asia that directly addresses the intersection of psychological science and the "Human 5.0" digital landscape.
- Comprehensive Core-to-Elective Pipeline: Balance essential psychological foundations (Ethics, Research Methods, Psychometrics) with cutting-edge specialisation tracks like Forensic Cyberpsychology and Workforce Mental Health.
- Industry-Aligned Practicum: Gain direct, supervised professional experience, allowing students to apply cyberpsychological theories to actual organisational or community challenges.
- Dual-Perspective Competency: Develop a unique dual fluency—understanding both the psychological needs of the user/employee and the technical architecture of the digital platforms they inhabit.
- Future-Proof Skillset: Acquire highly transferable skills in behavioral data analysis, digital risk mitigation, and ethical AI implementation that remain resilient to rapid technological shifts.

Modules & Practicum

This programme includes 10 modules: 9 coursework modules and 1 practicum.

Core Modules

- Core Concepts of Cyberpsychology
- Research Methods & Statistics
- Ethical and Professional Issues in Psychology
- Mental Health of Cyber Workforce
- Psychometric Testing
- Research Project
- Forensic Cyberpsychology
- Practicum

Elective Modules (Choose 2)*

- Cyberpsychology of Deception **OR** Consumer & Media Cyberpsychology
- Cybercognition & Behaviour **OR** Social Psychology in Cyberspace

* Elective modules may be pre-selected. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the timetable **OR** among the intensive delivery modules - however such changes may prolong the study duration.

Who Should Attend

This programme is meticulously designed for ambitious professionals and graduates aiming to pioneer the next frontier of behavioural science:

- Psychology & Social Science Graduates: Individuals holding a bachelor's degree in psychology, counseling, or related disciplines who want to specialise in the rapidly expanding domain of cyberspace and digital behavior.
- Tech & Design Professionals: UX/UI researchers, product managers, software developers, and AI designers who want to deeply understand the psychological impact of their tech designs and optimise user engagement ethically.**
- Cybersecurity & IT Specialists: Professionals looking to master the "human element" of cybersecurity, understanding social engineering, insider threats, and the cognitive load of tech teams.**
- HR & Corporate Wellness Managers: People operations professionals tasked with managing remote workforces, digital burnout, and the overall mental well-being of a highly digitised workforce.
- Law Enforcement & Policy Professionals: Analysts, legal professionals, and policy makers aiming to understand digital deception, cyber-crime behavioural, and national digital health frameworks.**

Practicum

Practicum equips students with essential skills for career growth in digital intervention design, online behavior training, and technological psychological development. Students will apply their knowledge in a chosen digital, clinical, research or corporate setting - designing, delivering, and reflecting on a cyberpsychology-based initiative or session. They will receive professional supervision and feedback, using it to continuously improve and achieve key industry competencies in applied cyberpsychology.

** *Applicants without a Psychology-related Bachelor's degree must pass the pre-requisite modules (45 credits) to continue with the Master's Degree.*

This programme was designed in collaboration with the Cyberpsychology Research Group, University of Sydney, Australia & De Montfort University, Leicester UK.

DUAL DEGREE

Master of Education in LEARNING DESIGN AND TECHNOLOGY (ODL)

Open & Distance Learning (ODL)

(N-DL/0114/7/0025)(8/29)(MQA/PA17660)

Duration:

ODL - 2.5-3 years

This programme is specifically designed to provide:

- Innovative curriculum that combines the latest in learning sciences, AI - driven environments and cutting edge digital technologies.
- Professional development in applying practical skills taught by industry experts to design customized educational experiences.
- Supportive learning environments with state-of -the-art facilities and a variety of learner centric teaching methods to foster independent learning through research informed teaching.

Career options

- Teacher
- Learning Design Specialist
- E-Learning Trainer
- Instructional Designer
- Digital Learning Designer
- Adaptive Learning Designer
- Educational Technology Executive
- Curriculum Developer
- Educational Technology Manager
- Corporate Training Manager
- Education Technology Entrepreneur
- Data Scientist in Education
- Education Planning Advisor
- Education Policy Advisor

Premier Digital Tech Institution

The Benefits of the Programme

Our master's programme offers a transformative learning experience, equipping you with the skills and knowledge to excel in the ever-evolving field of education:

- Comprehensive Mastery: Gain a deep understanding of learning design and technology, integrating essential topics from learning sciences to AI-driven environments.
- Practical Skills: Develop hands-on experience with advanced digital technologies to create personalised learning environments.
- Leadership in Innovation: Cultivate your capacity for visionary leadership, ethical practices, and data-informed decision-making.

This programme imparts advanced knowledge and cultivates practical skills necessary for tomorrow's educational leaders.

Who Should Attend

This programme is for those who want to be at the forefront of educational innovation, shaping the future of learning in various settings, from traditional classrooms to corporate training environments and online platforms.

This programme is ideal for individuals who:

- Work as teachers, educator, trainers, educational administrators, or instructional designers.
- Are passionate about integrating technology into educational settings and improving learning outcomes.
- Want to lead technology integration initiatives in schools, universities, or corporate training departments.
- Are committed to lifelong learning and staying current with the latest trends in educational technology.
- Have a keen interest in addressing educational challenges through technological solutions.

Modules & Project

This programme comprises 9 coursework modules and a Research Project.

Pre-Requisite Modules (For Non-Education Students)
Duration: 2 months (ODL)
- Pedagogy for Teaching in a Digital Age
- Principles of Curriculum Design

Core Modules
- Learning Sciences
- Digital Learning Environments
- Innovative Assessments
- Learning Design
- AI Driven Learning Resources
- Psychology for Learning
- Research Methodology
- Learning Analytics for Decision Making
- Research Project

Elective Modules (Choose 1)*
- Cybersecurity in Educational Technology
- Video Games and Education
- Managing Creativity and Innovation

* Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester **OR** among the intensive delivery modules – however such changes may prolong the study duration.

Research Project

You will be expected to demonstrate the ability to plan and undertake a research project, conduct a thorough investigation of your chosen area of study, extend knowledge related to this area, and defend your work to academic peers. The project report should demonstrate a deep understanding of relevant theories and concepts, as well as the application of theoretical knowledge to real-world problems in business and industry.

Postgraduate Diploma of Education in LEARNING DESIGN AND TECHNOLOGY (ODL)

DUAL DEGREE

Open & Distance Learning (ODL)

(N-DL/0114/7/0031)(09/29)(MQA/PA17658)

Duration:

ODL - 2 years

This programme is specifically designed to provide:

- Innovative Curriculum: Dive into a program that combines the latest in learning sciences, AI-driven environments, and cutting-edge digital technologies.
- Professional Development: Learn from industry experts and gain practical skills to design adaptive, inclusive educational experiences.
- Supportive Learning Environment: Benefit from state-of-the-art facilities and a variety of teaching methods designed to foster independent learning and research.

Career options

- Learning Design Specialist
- E-Learning Trainer
- Instructional Designer
- Digital Learning Designer
- Adaptive Learning Designer
- Educational Technology Executive
- Curriculum Developer
- Educational Technology Manager
- Corporate Training Manager
- Education Technology Entrepreneur
- Education Technology Policy Advisor

Premier Digital Tech Institution

The Benefits of the Programme

Our Postgraduate Diploma of Education in Learning Design and Technology provides an in-depth exploration of key areas essential for educational innovation and leadership:

- Comprehensive Skill Development: Enhance your ability to design, implement, and evaluate effective learning experiences across a range of contexts.
- Applied Learning: Engage in Professional Practice to apply your knowledge in real-world settings, developing critical skills in adaptive and inclusive learning design. Learn to manage creativity and innovation while addressing diverse educational challenges.
- Leadership and Career Advancement: Develop the expertise needed to lead educational innovation and drive change across diverse environments. Engage in research that fosters life-long learning, equipping you with the skills to adapt and grow continuously in an evolving educational landscape.

Modules & Professional Practice

The programme comprises of 7 coursework modules and 2 Professional Practice.

Pre-Requisite Modules (For Non-Education Students)
Duration: 2 months (ODL)
- Pedagogy for Teaching in a Digital Age
- Principles of Curriculum Design

Core Modules
- Learning Sciences
- Digital Learning Environments
- Innovative Assessments
- Learning Design
- AI Driven Learning Resources
- Psychology for Learning
- Professional Practice 1
- Professional Practice 2

Who Should Attend

This Postgraduate Diploma programme is ideal for individuals who seek to enhance their expertise in the integration of technology into education and training:

- Teachers, educators and trainers looking to enhance their skills in digital learning, innovative assessments, and educational technology.
- Instructional Designers and Learning Technologists who want to explore advanced topics like AI-driven resources and cybersecurity, etc.
- Educational Leaders and Corporate Trainers aiming to lead technological innovation and manage creativity in various learning environments.
- Professionals Transitioning to Education interested in gaining foundational knowledge in learning design and technology.

Professional Practice

Professional Practice equips participants with essential skills for career growth in programme creation, training, and development. Participants will apply their knowledge in a chosen educational or training setting, designing, delivering, and reflecting on a session. They will receive observation and feedback, using it to continuously improve and achieve key competencies.

Aligned with the Microsoft Elevate for Educators Expert Pathway

Selected modules support the development of digital teaching competencies relevant to the MEE Expert pathway.

Separate application and eligibility requirements apply.

Postgraduate Certificate of Education in LEARNING DESIGN AND TECHNOLOGY (ODL)

DUAL DEGREE

(N-DL/0114/7/0032)(09/29)(MQA/FA17661)

Open & Distance Learning (ODL)

Duration:
ODL - 1 year

This programme is specifically designed to provide:

- Essential competencies and skills that empower you to create impactful educational experiences across diverse settings.
- Hands-on experience through direct engagement with cutting-edge theories and strategies in real-world educational contexts, enhancing your ability to innovate and adapt in diverse learning environments.
- Expert knowledge through learning opportunities guided by experienced professionals and leaders in the field of educational technology.

Career options

- Teacher
- Learning Design Specialist
- E-Learning Trainer
- Instructional Designer
- Digital Learning Designer
- Adaptive Learning Designer
- Educational Technology Executive
- Curriculum Developer

Premier Digital Tech Institution

The Benefits of the Programme

Our Postgraduate Certificate of Education in Learning Design and Technology offers a dynamic introduction to the foundational elements of digital learning and educational innovation:

- Foundational Knowledge: Understand how to create engaging and effective learning experiences in digital contexts.
- Practical Application: Gain hands-on experience through the Professional Practice, where you will apply your knowledge in real-world settings, developing the skills to manage creativity and innovation in diverse educational environments.
- Cutting-Edge Insights: Explore current trends in educational technology. Stay at the forefront of innovation by understanding the latest tools and techniques for enhancing learning through technology.

Modules & Project

The programme comprises of 4 coursework modules and a Professional Practice.

Pre-Requisite Modules (For Non-Education Students)
Duration: 2 months (ODL)
- Pedagogy for Teaching in a Digital Age
- Principles of Curriculum Design

Core Modules
- Learning Sciences
- Learning Design
- Digital Learning Environments
- Innovative Assessments
- Professional Practice 1

Who Should Attend

This Postgraduate Certificate programme is ideal for individuals who seek to enhance their expertise in the integration of technology into education and training:

- Teachers, educators and trainers seeking to gain foundational knowledge in digital learning and innovative assessment methods.
- Professionals in Education Technology looking to explore new trends in education.
- Career Changers interested in entering the field of learning design and educational technology with a focus on practical application.

Professional Practice

Professional Practice equips participants with essential skills for career growth in programme creation, training, and development. Participants will apply their knowledge in a chosen educational or training setting, designing, delivering, and reflecting on a session. They will receive observation and feedback, using it to continuously improve and achieve key competencies.

Why our APU PhD by Research & DBA Programmes?

- You will be assigned to a group of highly qualified supervisors.
- Wide range of latest research areas in the fields of computing and business administration areas.
- We have our regular research workshops, colloquium and seminars facilitated by local and international academicians and professionals.
- Comprehensive Student Support Services.
- Resourceful online databases.

DOCTOR OF PHILOSOPHY PROGRAMME STRUCTURE

Application Process

Ideally, student works with potential supervisors to develop proposal.

DURATION FOR PhD / DBA

The minimum and maximum duration of the PhD / DBA programme are as follows:

Study mode	Normal minimum period*	Normal maximum period**
Full Time	3 years	5 years
Part Time	4 years	6 years

* Completion of studies is subject to approval from the Senate
** Candidates with Extenuating Circumstances may apply for approval to extend the duration of study

Students are required to enrol in the Research Methods module to fill the gaps in research skills.

Minimum Entry Requirement

Doctor of Philosophy (PhD) Programmes

- A Masters degree in a related field accepted by the APU Senate
- Other qualifications equivalent to a Masters degree that are accepted by the APU Senate

Doctor of Business Administration (DBA)

- Master's degree in related fields, or its equivalent qualification as accepted by the Senate.
- Master's degree in non-related fields as accepted by the Senate and with relevant working experience, subject to a rigorous internal assessment.
- Master's degree in non-related fields as accepted by the Senate and without relevant working experience, subject to passing pre-requisite courses.

- Econometrics

Doctor of **BUSINESS ADMINISTRATION**

(N/0414/8/0071)(04/28)(MQA/MQA/FA14557)

Duration:
Full-time - 3 years
Part-time - 4 years

This programme is designed for executives, professionals and leaders to prepare them for digital transformation, by:

- Applying innovation and technology in problem-solving—guided by Design Thinking ideals.
- Employing real-world coaching and providing an entrepreneurial outlook via our in-class and value-added activities.
- Participating in thought leadership sessions delivered by our academic staff and Industry partners.
- Learning and collaborating in a highly dynamic and interactive world-class environment.
- Future-proofing themselves and enabling them to lead digital transformation in organisations.

Career options

- Management Analyst
- Business Consultant
- Business Research Analyst
- Market Research Analyst
- Entrepreneur
- Economist
- Professor
- Chief Marketing Officer (CMO)
- General Manager
- Analytics & Reporting Manager
- Decision Analytics Manager
- Management Consultant
- Chief Executive Officer (CEO)
- International Marketing Manager

Premier Digital Tech Institution

The Benefits of the Programme

No Exams
100% Courseworks/ Assignments

- The APU DBA prepares you to address the challenges within an increasingly Volatile, Uncertain, Complex and Ambiguous (VUCA) digitalised world.
- The knowledge and experience gained via APU's DBA will allow you to sharpen your skills and competencies in decision making, strategic thinking, and problem solving - be it for work or personal aspirations. The programme is also designed to enhance your research skills which can be applied to strategic formulation, policy formation and organisational risk assessment and mitigation plans.
- The APU DBA programme has a unique digital emphasis and is a technology-infused leadership programme that focuses on future-proofing leaders in a highly volatile and uncertain future.
- The Malaysian Institute of Accountants (MIA) has endorsed APU DBA to enhance and progress existing business knowledge, gaining perspective of contemporary business issues, future trends, and complex problems that require analytical skills to solve.
- Under a strategic collaboration with the Chartered Management Institute, UK, you have the exciting opportunity of enrolling for the exclusive APU-CMI Dual Certification by adding a separate CMI qualification to your APU qualification, you are really on the road to success to be truly recognised globally as a Professional Manager.

Modules & Dissertation

The emphasis of the DBA programme is on collaboration, interpersonal relationship building and applied experiential learning. Students are required to complete 10 taught modules on the DBA which are delivered in a combination of online and face-to-face blended learning modes depending on the module.

Pre-Requisite Modules (for non-business students)
Duration: 1 month (Full-time), 2 months (Part-time)

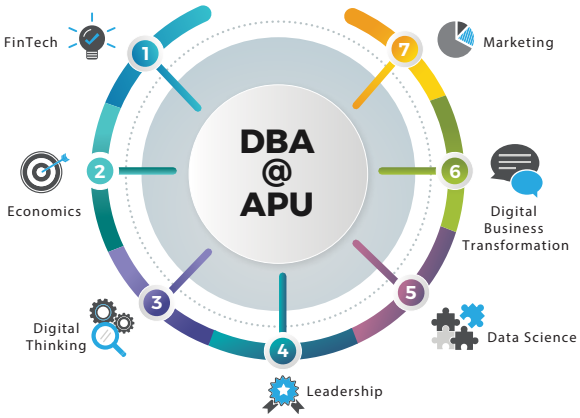

- Managing People
- Understanding Customers
- Managerial Finance
- Business Environment & Strategic Planning

Modules

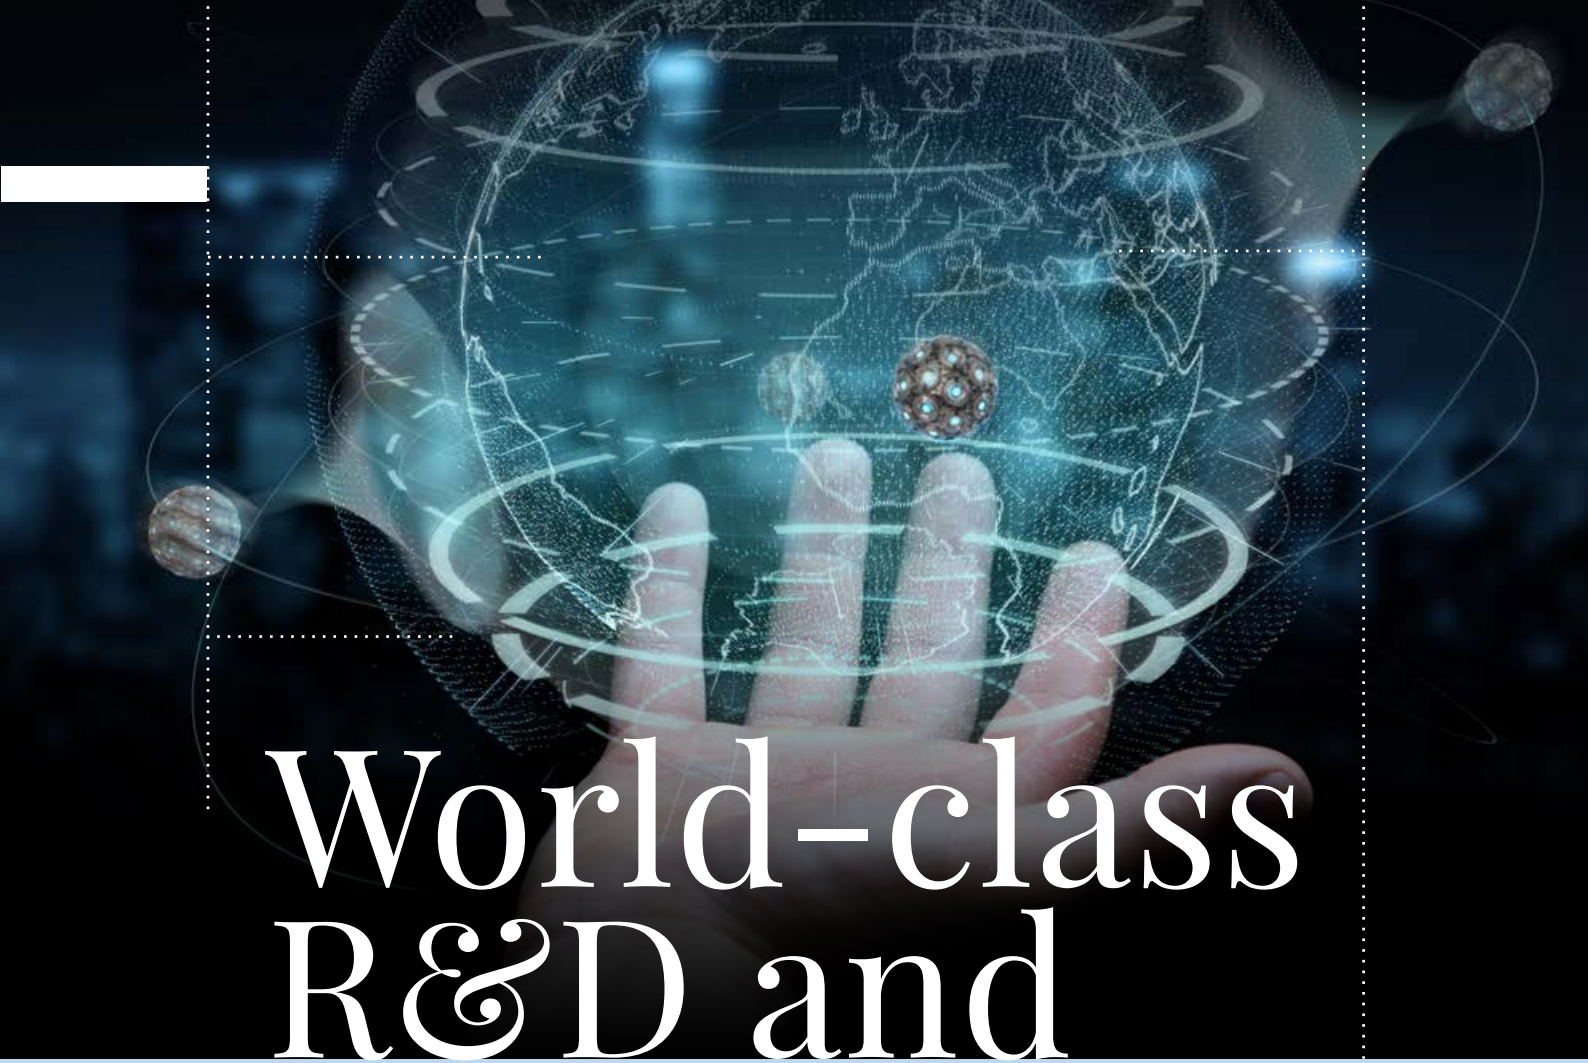

- Strategic Management for Integrated Value Creation
- Accounting and FinTech in Digital Transformation
- Advanced Marketing Intelligence and Research
- Research Methodology
- Leadership and Organisational Science
- Digital Thinking and Innovation Management
- Data Science and Business Analytics
- Quantitative Research OR Qualitative Research
- Digital Business Transformation
- Global Economic and Business Issues
- Dissertation

Dissertation
The breakdown of the Dissertation is as below:

Endorsed by:

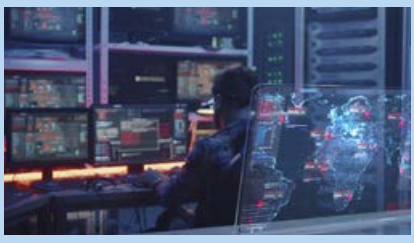

World-class R&D and Innovation

ACADEMIC RESEARCH

For our staff, learning is a continuous journey where we keep abreast with the latest knowledge in a variety of fields. Our academic staff publish papers and present them at conferences worldwide. Some of the areas of research include:

- Embedded Systems & RFID
- Biometrics
- Games Engines
- 3D Graphics and Virtual Reality
- Security
- New Media Technologies
- Knowledge Management
- Mobile Learning
- Wireless Networks and Internet of Things (IoT)
- Adding Facial Expressions to Talking Head Models
- Marketing Professional Services
- Two and Three Dimension Audio-Visual Speech Synthesis
- Handwritten Signature Verification Using a Single Master Signature
- Customer Care
- E-Learning
- Entrepreneurial Business
- Various Aspects of Accounting
- International Marketing
- Generation of Business Ideas
- Organisational Culture Change
- Strategic Diversification Evaluation
- Artificial Intelligence
- Cloud Computing
- Security and Forensics
- Internet of Things (IoT)
- Malware Analysis
- Big Data

INNOVATIVE INDUSTRY-BASED RESEARCH CENTRES @ APU

Asia Pacific Centre of Analytics (APCA)

Asia Pacific Centre of Analytics – APCA is established in association of multi-discipline expertise from various schools in APU. The vision of APCA is to establish the foundation to develop young data scientists to meet the demands in Malaysia and global. The expertise and experience cover areas of Data Management, Machine Learning, Behavioral Studies, Business Cases, Statistics and Engineering. The formation directs to broad activities in Big Data ecosystem, in line with National vision to make Big Data Analytics the catalyst for nation's economic development: Creating new area in BDA studies, Embedding BDA topics into Undergraduate and Postgraduate studies, Development of Educational and Industrial Framework, Creating Project Marketplace, Research project commercialisation and crowdfunding, Consultancy and Training Services.

Centre for Research and Development of IoT (CREDIT)

The establishment of Centre for Research and Development of IoT (CREDIT) is a significant milestone that supports the objectives of the Malaysia National IoT Strategic Roadmap initiative. CREDIT aims to provide students and academic staff the opportunities to access IoT-related knowledge and know-how through various activities. It also acts as a hub to support commercialising potential state-of-the-art solutions resulting from R&D projects.

Forensic and Cyber Security Research Centre (FSEC)

The establishment of Forensics & Cyber Security (FSec) center is to be a recognised Forensics and Cyber Security Research and Development Centre which acts as an international resource for government, industry and academia. This vision has kept us on the toe and with the closing of all cases including expert testimonies given by our dedicated analysts.

Asia Pacific Center of Robotics Engineering (APCore)

The APCORE (Asia Pacific Center of Robotics Engineering) is an initiative by APU School of Engineering to develop the robotic engineering field within the school. The center undertakes research in various areas of robotics especially humanoid robot development, robotic sensors, robotic vision and biomedical robotics. This will involve lectures by industrial experts and in-house research activities in these areas. The center is also a meeting point for students and lecturers to share ideas and assess their work, as well as a platform for collaboration with industry to keep the research and technology used to be relevant and current. APCORE aims to help lecturers and students to gain knowledge with get hands on experience through involvement in continuous development of robotics technology. Some of projects conducted by APCORE include the development of tele-presence and humanoid robot, participations in international exhibitions and competitions.

Visionary AI Studio

The Visionary AI Studio at Asia Pacific University of Technology and Innovation serves as a pioneering hub for artificial intelligence research across diverse disciplines. The studio champions interdisciplinary initiatives in engineering, computing, psychology, finance, and business, with a core emphasis on Applied AI — translating theoretical advances into practical, real-world solutions. Focusing on Machine Learning Mastery, Artificial Intelligence Innovations, Data Science Discovery, and AI Ethics and Governance, VAS develops cutting-edge algorithms and data-driven insights while ensuring ethical considerations guide all research endeavors. Through collaborative efforts, the studio bridges the gap between AI theory and application, addressing complex challenges, driving positive societal impact, and empowering future generations of AI practitioners.

XRStudio

The APU XR Studio serves as an XR/Spatial Computing laboratory, designed for shared and collaborative education experiences that excite, inspire and stimulate. Students will learn the skill sets required to design compelling stories through the values of spatial computing. With the integration of multiple disciplines, the skills of students are honed – technically and creatively, to ultimate generate high value creative technologists for the new digital paradigm.

APU 5G Research Lab

The APU-5G research lab was established to serve as a platform for members from academia, business and industry to collaborate on 5G research to create market ready, innovative 5G technology solutions, applications and business ventures. The APU-5G research lab facilitates research at circuit, system and network level in 5G technologies and also is focused to the pathway for 6G technology to develop a powerful, faster, greener, sustainable network which will be smarter with infusion of AI, ML and Reinforcement learning.

The research lab aims at exploring the cutting edge technologies such as SDN, NFV, mm/THz Wave Band, Radio Access, Massive MIMO, D2D Communication, Ultra Densification, IoT, Big Data, Mobile Computing and fusion of AI and ML for development of 5G core and Radio Access Network Infrastructure. The developed 5G Network Infrastructure will be a platform to develop and test a range of use cases of primary, secondary and tertiary industries and business that are built on communication infrastructure. The 5G lab in association with the other research centers of APU will facilitate research in 5G network security, Network Data Collection and Analysis for Smarter 5G/6GNetwork and Highspeed Sensor Networks for Autonomous Industry.

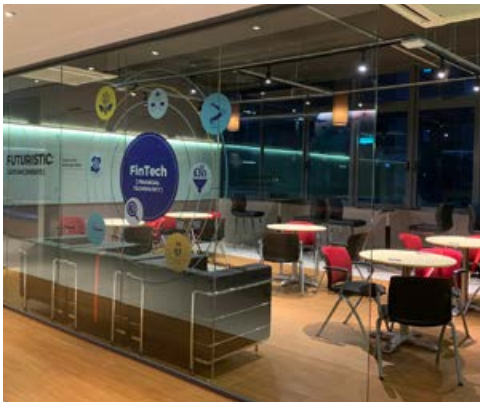

Postgraduate Studies Facilities

Award-Winning University

268 Awards
at Local, Regional and International Levels in 2025

Recent Awards

MYStartup Hackathon X DNB
– Winner

GOOGLE 30-Hour No-Code Hackathon
– Champion

Intel & Crest Industry-University Challenge
– Grand Prize

APU-AWS DeepRacer Competition
– Champion

Great Malaysia AI Hackathon
– Champion

Microsoft's Code; Without Barriers Hackathon
– Champions

Shell Selamat Sampai Varsity Challenge
– Champion

PETRONAS Inter-University Capture The Flag Challenge
– Champion

MAKING HISTORY - AWARDS AND ACHIEVEMENTS

Awards received by the university and our students at local, regional and international competitions are a testimony to their knowledge, skills and professional attributes.

Intel AI Global Impact Festival
- Champion

ImpactHack by Standard Chartered
- Champion

Asia Pacific, Japan, and China (APJC) Cisco Netriders Competition
- Champion

Asia Pacific ICT Alliance (APICTA) Awards
- National Champion

MDEC PDTI Awards Winners
- Outstanding Faculty Award (University Category)
- Outstanding Faculty Member Awards (3rd Place)
- Outstanding Student Awards (1st Place, 2nd Place, & Consolation Prize)

PayNet Digital Campus 2.0 Campaign
- Champion

HILTI Global IT Challenge
- Champion

James Dyson Award Malaysia
- National Champion

Cybersecurity Excellence Awards
- Gold Winner

Institute of Engineers Malaysia (IEM) Award
- Gold Award

Society Of Petroleum Engineers (SPE) International Award
- Outstanding Student Chapter & Excellence Award

For more awards listing, please visit APU website.
